Party Jumpers Delivers Professional Bounce House and Inflatable Rentals to Families and Organizations Throughout Southern California's Inland Empire and San Gabriel Valley from Their Claremont Location

December 15, 2025

CLAREMONT, CA - December 15, 2025 -

Party Jumpers, a professional party rental company headquartered at 415 W Foothill Blvd, Suite 209 in Claremont, California, continues to provide families and organizations throughout Southern California with safe, clean inflatable entertainment for celebrations of all sizes. Founded by Cameron Dallas, the company operates as a licensed and insured party rental business serving the Inland Empire, San Gabriel Valley, and surrounding communities ? delivering bounce houses, water slides, obstacle courses, and mechanical bull rentals directly to homes, parks, schools, churches, and corporate venues across the region.

Party Jumpers maintains a comprehensive inventory of commercial-grade inflatable entertainment designed to accommodate various event types, venue sizes, and age groups. The company's rental catalog includes traditional bounce houses and character-themed units featuring reinforced seams and commercial-grade vinyl construction, as well as bounce house combos that combine jumping areas with slides, obstacles, and climbing elements within a single unit. For summer events, Party Jumpers offers water slides ranging from

compact backyard models to large-scale units, with options for both wet and dry use depending on season and customer preference. The company also provides obstacle courses designed for team-building events, school field days, and competitive entertainment, along with professional-grade mechanical bull rentals complete with trained operators and safety equipment for corporate events, fundraisers, western-themed parties, and community festivals.

What distinguishes Party Jumpers from informal rental arrangements is the company's systematic approach to safety and equipment maintenance. Each inflatable unit undergoes thorough cleaning and disinfection following every rental using commercial-grade sanitizing products. The company's setup teams receive training in proper equipment installation, stake placement, and securing procedures appropriate to each surface type. During delivery and setup ? which typically occurs one to three hours before the customer's requested start time ? Party Jumpers staff review safety guidelines covering age and weight restrictions, capacity limits, supervision requirements, and weather-related protocols. All inflatables operate using commercial-grade blowers that provide continuous airflow throughout the rental period, and the company maintains generator rental services for venues without accessible electrical power.

From their Claremont headquarters, Party Jumpers delivers rental equipment throughout Southern California's Inland Empire and San Gabriel Valley regions. Primary service cities include Claremont, Upland, Rancho Cucamonga, Ontario, Chino Hills, West Covina, San Dimas, Yorba Linda, Eastvale, Montclair, and Chino, with delivery available to surrounding communities throughout the region. The company schedules deliveries with arrival windows designed to ensure equipment is fully operational before guests arrive, without counting setup time against the customer's rental period.

Party Jumpers structures its booking process to provide clarity regarding rental terms, pricing, and logistics from the initial inquiry through event completion. Customers can reserve equipment through the company's website at getpartyjumpers.com or by contacting the office directly at (909) 248-8441. All reservations require a $50 credit card deposit to secure the rental date, with the company maintaining a cancellation policy that provides full deposit refunds for cancellations made eight or more days prior to the event. Rental periods are provided in four to six-hour blocks, beginning at the customer's requested start time rather than when setup occurs, and extension requests are accommodated based on delivery schedule availability.

The company operates as a licensed party rental business in California and maintains insurance coverage for all rental operations. This business infrastructure provides customers with assurance that their rental transaction involves a legitimate, established company with professional accountability rather than informal equipment sharing arrangements. Party Jumpers also provides complementary rental items including tables, chairs, and concession equipment such as popcorn machines, cotton candy makers, and snow cone stations

to support complete event planning needs.

"We built Party Jumpers around the idea that families and organizations deserve rental equipment that arrives clean, operates safely, and comes with professional service," said Cameron Dallas, founder of Party Jumpers. "Every rental represents someone's important celebration, and we take that responsibility seriously. Our team focuses on the details ? from equipment maintenance to setup precision to clear communication ? so customers can focus on enjoying their event."

The company serves residential customers planning birthday parties, family reunions, graduation celebrations, and backyard gatherings, as well as schools organizing field days and end-of-year events, churches hosting community festivals and youth group activities, businesses coordinating corporate picnics and team-building functions, and community organizations requiring entertainment solutions for public events and fundraisers. Party Jumpers' equipment selection and delivery infrastructure accommodate events ranging from small residential celebrations to large-scale community gatherings requiring multiple entertainment units and support equipment.

Party Jumpers serves families and organizations throughout Southern California's Inland Empire and San Gabriel Valley with inflatable rentals and party equipment. Staff members assist with equipment selection, venue suitability assessments, power requirements, and logistics planning for events of various sizes. Equipment inventory, including dimensions, capacity information, setup requirements, and pricing, is available at getpartyjumpers.com.
