

Disaster Free Toiletries Bag Redesigned For Easy Passage Through Airport Security

March 11, 2016

March 11, 2016 - PRESSADVANTAGE -

Zombie Disaster Kits, a business in Vancouver, Washington, has redesigned their toiletry bags to enable travelers to easily pass through airport security screening. This bag will allow them to bring both drinks and snacks on board the aircraft. In addition, they have also launched their free TSA and Global Entry Guides. These guides have been designed to help people get through airport security screening easily and without stress by conforming to all the necessary regulations. The kit and guides are available through the company's website at ZombieDisasterKits.com.

Jillian Gregg from Zombie Disaster Kits says: "The TSA rules and similar rules in airports across the world can be a real headache. What if people find themselves in the aircraft with nothing to eat or drink for some reason, such as when there is too much turbulence and the food and beverage carts cannot be rolled out. Our new kit includes two Velcro in/out bags for liquids and three food grade silicone bottles for snacks, all of which conform with TSA rulings."

The travelers toiletry bag effectively addresses the 3-1-1 Liquids & Gels Rule of the TSA. As such, it is a great investment for all travelers. Together with the TSA checklist, it ensures that people will no longer have

to go through airport screening feeling like a zombie. The kit itself can be purchased through the company's website, and also through their Amazon.com store.

Those who have tried the kit have been very positive about their experiences with it. "This is absolutely perfect for travel, although I'm just mad that I didn't find this before my flight two weeks ago," says Amazon customer Tara. "I would have been a lot more organized. This is absolutely perfect for travel. It's compact, sleek, folds down to about 2 inches, and has several compartments to put your 'stuff' in. Comes with 2 removable clear zippered bags and three bottles included, plus it has a hanger. Well made (not cheap). It's not bulky & all over the place like so many of those roll up travel bags. This one zips shut, and stays in a perfect little rectangle (like a mini suitcase) - complete with a little handle."

The ZombieDisasterkits.com site lists further details about TSA screening and rules to help make going through airport security a stress-free experience.
