

Hogge Precision?s Methodical Innovation Recognized Among South Carolina?s Elite Manufacturers

November 19, 2025

MILWAUKEE, WI - November 19, 2025 -

Hogge Precision Parts Co., Inc., a recognized leader in swiss screw machining and manufacturing, has been named a finalist for the 2025 Transformation and Operational Excellence Award by the South Carolina Manufacturers Alliance (SCMA) and the South Carolina Manufacturing Extension Partnership (SCMEP). This prestigious recognition highlights companies that embody innovation, continuous improvement, and operational discipline across South Carolina?s thriving industrial landscape.

This acknowledgement of excellence stands as a reflection of Hogge Precision?s long-standing dedication to quality and advancement in manufacturing. As a finalist, the company was distinguished among dozens of forward-thinking manufacturers for their ability to adapt, innovate, and deliver superior outcomes in a competitive and evolving sector. The Transformation and Operational Excellence Award, presented during the annual SC Manufacturing Summit, represents one of the state?s most meaningful acknowledgements of industrial leadership.

Founded on a heritage of precision, Hogge Precision has remained committed to advancing the standards of the screw machining industry. The company?s capacity to deliver intricate, high-tolerance components through both traditional screw machining and advanced Swiss screw machining techniques continues to set it apart in both capability and consistency. Through continuous process optimization and rigorous quality assurance practices, the company has achieved a balance between technological investment and workforce development that drives sustainable success.

Hogge Precision?s operational excellence is not a product of chance but the result of disciplined execution across every department, from planning and production to quality and logistics. The nomination reinforces the company?s ability to operate with precision and responsiveness, two qualities that are essential in sectors ranging from aerospace and defense to medical and electronics manufacturing. At its core, the organization?s mission has been to meet the exacting demands of customers who rely on zero-defect parts and consistent supply chain performance.

The South Carolina Manufacturers Alliance and SCMEP jointly established the Transformation and Operational Excellence Award to highlight organizations that demonstrate exemplary use of lean principles, data-driven decision-making, and measurable results across manufacturing operations. Hogge Precision?s submission included tangible achievements in workflow optimization, lead-time reduction, and employee-driven process improvements?each underscoring its role as a proactive force in South Carolina?s manufacturing community.

Danny Hogge Jr., President of Hogge Precision, expressed appreciation for the nomination, stating, ?Being named a finalist by the SCMA and SCMEP is a profound honor. It affirms our team?s ongoing dedication to innovation and operational rigor. Every advancement we make?whether in our CNC machining processes or our precision approach to Swiss screw machining?is rooted in a culture of accountability and craftsmanship.?

Hogge Precision?s recent initiatives have included investments in real-time production monitoring, automation integration, and lean workforce training. These improvements not only enhanced throughput and consistency but also fostered a workplace culture that values efficiency, safety, and continuous growth. The ability to align employee engagement with technical innovation has proven key in maintaining the company?s competitive edge.

While the award process itself is a competitive and multifaceted evaluation, the significance of being shortlisted speaks volumes about Hogge Precision?s influence within the state?s manufacturing sector. As a family-owned business with a decades-long presence in Hartsville, South Carolina, the company has played a consistent role in advancing local economic development while upholding national and international quality benchmarks.

Throughout its history, Hogge Precision has maintained an unwavering commitment to tight tolerance work, whether producing standard turned parts or engineering custom solutions for complex mechanical assemblies. The company?s technical capabilities are backed by ISO-certified quality systems and a skilled team dedicated to upholding rigorous standards from the first cut to final inspection.

Recognition from the SCMA and SCMEP serves as a catalyst for further innovation. With customers increasingly demanding agility, customization, and reliability, Hogge Precision continues to evolve by refining its processes, investing in next-generation tooling, and embracing digital transformation. These efforts are made not only to remain competitive but also to lead by example within the broader industrial ecosystem.

As Hogge Precision reflects on this milestone, the company remains forward-focused. From expanding its Swiss screw machining capabilities to optimizing its supply chain logistics, each strategic move is intended to reinforce the trust clients have placed in the company for decades. This recognition only further motivates the team to continue delivering excellence with every part produced.
