

Flagstop Car Wash Expands to Bon Air, Bringing Express Service and Eco-Friendly Technology to North Chesterfield

November 20, 2025

NORTH CHESTERFIELD, VA - November 20, 2025 - PRESSADVANTAGE -

Flagstop Car Wash has officially opened its newest location in Bon Air, marking a significant expansion for the Central Virginia car wash chain. The new facility at 11571 Robious Road represents the company's continued investment in the Greater Richmond area and introduces state-of-the-art automated car wash technology to the North Chesterfield community.

The Bon Air location, positioned at the intersection of Robious Road and Huguenot Road across from Robious Middle School and Robious Elementary School, offers residents and commuters an express drive-through car wash experience with environmentally conscious operations. The facility operates daily with regular hours from 8:00 a.m. to 8:00 p.m., adjusting to 7:00 a.m. to 7:00 p.m. during winter months.

The addition of the Bon Air location addresses increasing demand for convenient car care services in one of the region's fastest-growing suburban corridors. North Chesterfield, with its proximity to downtown Richmond

via the Powhite Parkway and Route 288, serves thousands of daily commuters who pass through the Robious Road corridor. The location's strategic positioning near residential communities including Brandermill, Woodlake, and Bon Air proper provides easy access for local families and professionals alike.

The Bon Air facility features Flagstop's signature soft foam washing process, which utilizes advanced cleaning chemistry designed to be gentle on vehicle finishes while delivering thorough cleaning results. Unlike traditional car washes, the automated tunnel system applies treatments including polishing foam and clearcoat protectant as vehicles move through the wash bay, completing the process in minutes. Environmental sustainability stands as a key component of the facility's design. The eco-friendly operation incorporates water reclamation systems and biodegradable cleaning solutions, reducing environmental impact while maintaining cleaning effectiveness. This approach aligns with growing consumer preferences for businesses that prioritize sustainability alongside service quality.

Following the automated wash process, customers have access to an extensive array of complimentary self-service amenities. The facility includes multiple free vacuum stations, carpet floor mat cleaners, and a rubber mat cleaning station, allowing customers to complete interior maintenance at no additional cost. Additional amenities include tire shine spreaders, windshield washer stations, and free-to-use body and glass towels with glass cleaner. Air fresheners are provided while supplies last, and air detailers are available for customers seeking to add finishing touches. The shammy dry stations offer customers the option to hand-dry their vehicles after the automated wash cycle. All payment systems are cashless, streamlining the transaction process and reducing wait times.

The Bon Air location features a dedicated member lane, providing expedited service for customers enrolled in Flagstop's unlimited wash membership programs. This express access reduces wait times during peak periods and offers value for frequent users. The membership model has gained popularity among daily commuters who appreciate the convenience of unlimited washes without per-visit charges. The facility's design accommodates high-volume traffic flow, with multiple entry points and efficient queue management systems that minimize congestion on Robious Road. The automated payment systems accept various payment methods, eliminating the need for cash transactions and speeding customer processing.

The opening of the Bon Air location creates new employment opportunities in North Chesterfield, from facility management and maintenance positions to customer service roles. The facility's operation also contributes to the local tax base while providing a service that supports the appearance and maintenance of vehicles throughout the community. The car wash industry has experienced steady growth in recent years, driven by consumer preferences for professional cleaning services over at-home washing. Professional car washes also offer environmental advantages over residential driveway washing, as commercial facilities are required to treat and reclaim water rather than allowing it to flow untreated into storm drains.

Flagstop has integrated modern technology into the customer experience, offering mobile app and website ordering capabilities. Customers can purchase washes remotely and proceed directly to the wash entrance upon arrival, further reducing wait times. This digital integration appeals to tech-savvy consumers who prioritize efficiency in service transactions. The company's app also provides membership management features, wash history tracking, and promotional notifications, creating a seamless digital experience that complements the physical facility.

The Bon Air location joins Flagstop's growing network of car wash facilities across Central Virginia, including locations in Ashland, Charlottesville, Brandermill, and Sliding Hill. This expansion demonstrates the company's commitment to the Greater Richmond market and its confidence in the region's economic vitality. The Robious Road corridor has experienced significant commercial development in recent years, with the area becoming a hub for retail, dining, and service businesses. The Flagstop location adds to this commercial ecosystem while serving both the immediate Bon Air community and the broader Chesterfield County population.

As the Bon Air location establishes its presence in the North Chesterfield market, Flagstop continues to evaluate additional expansion opportunities throughout Central Virginia. The company's express service model, combined with its environmental focus and comprehensive amenities, positions it to meet evolving consumer expectations in the car care industry.
