

Keathley Landscaping Expands Residential Yard Drainage Solutions to Address North Texas Water Management Challenges

December 04, 2025

GARLAND, TX - December 04, 2025 -
Keathley Landscaping, a Dallas-based landscape contractor and NDS Certified Drainage Contractor, has expanded its specialized drainage services to meet increasing demand for professional water management solutions across North Texas residential properties. The expansion addresses complex drainage challenges that threaten homes throughout the region, particularly as seasonal rainfall patterns and clay soil conditions continue to create water management issues for homeowners.

The expanded drainage services include comprehensive system design and installation, French drain implementation, advanced grading solutions, channel drain systems, and custom-designed buried drainage pipes. These solutions target the costly water damage risks that inadequate drainage poses to residential properties, damage that typically falls outside standard homeowner insurance coverage.

"North Texas homeowners face unique drainage challenges due to our clay soil composition and intense

seasonal rainfall patterns," said Logan Keathley, owner and NDS Certified Drainage Contractor at Keathley Landscaping. "We've expanded our drainage capabilities to provide comprehensive solutions that protect properties from water damage while maintaining the aesthetic appeal of outdoor spaces. Every property presents different challenges, but with the right expertise and approach, there's always a solution that won't break the bank."

The expansion comes as residential property owners increasingly recognize the importance of professional drainage installation in protecting their investments. Poor lawn drainage can lead to foundation damage, landscape erosion, and unusable yard areas during wet seasons. The company's certification through NDS (National Diversified Sales), a leading drainage products manufacturer, ensures adherence to industry best practices and access to advanced drainage technologies.

Keathley Landscaping's drainage solutions integrate seamlessly with existing landscape features and can be incorporated into broader landscape renovation projects. The company combines its drainage expertise with complementary services including stonework, retaining walls, and landscape design to create comprehensive outdoor environments that manage water effectively while enhancing property value.

The drainage expansion particularly benefits homeowners dealing with standing water, soil erosion, and foundation moisture issues. Properties with irregular grading, low-lying areas, or inadequate existing drainage systems can experience significant improvement through professional assessment and targeted drainage installation. The company's approach emphasizes long-term solutions rather than temporary fixes, utilizing quality materials and proven installation techniques.

"Proper drainage is the foundation of any successful landscape project," added Keathley. "We're seeing more homeowners understand that investing in professional drainage solutions prevents thousands of dollars in potential water damage while creating more usable outdoor spaces throughout the year."

Beyond drainage services, Keathley Landscaping continues to offer its full range of landscaping solutions including sod installation, landscape lighting, stonework and retaining walls, fence repair and installation, patio covers, outdoor kitchens, fire pits, and tree services. The company's integrated approach allows property owners to address multiple landscape needs through a single contractor familiar with North Texas soil conditions and climate challenges.

Keathley Landscaping has served the Dallas metropolitan area since 2002, establishing a reputation for practical solutions and quality workmanship. The company serves Dallas, Garland, Wylie, Plano, and surrounding communities throughout North Texas.
