

Keathley Landscaping Expands NDS Certified Drainage Contractor Services to Address Water Management Challenges

December 12, 2025

GARLAND, TX - December 12, 2025 -
Keathley Landscaping has expanded its specialized drainage services to meet the growing demand for professional water management solutions across North Texas residential properties. The expansion addresses complex drainage challenges that threaten homes throughout the region, particularly as seasonal rainfall patterns and clay soil conditions continue to create water management issues for homeowners.

The Dallas-based landscape contractor now offers comprehensive drainage system design and installation, including French drain implementation, advanced grading solutions, channel drain systems, and custom-designed buried drainage pipes. These services aim to mitigate the costly water damage risks that inadequate yard drainage poses to residential properties, damage that typically falls outside standard homeowner insurance coverage.

"Poor drainage remains one of the most significant threats to residential property values in North Texas," said

Logan Keathley, Owner of the company. "Clay soil combined with intense seasonal rainfall creates perfect conditions for foundation damage, landscape erosion, and unusable outdoor spaces. Our expanded drainage services provide homeowners with long-term solutions that protect their investments while maintaining the aesthetic appeal of their landscapes."

The expansion comes as residential property owners increasingly recognize the importance of professional drainage installation in protecting their homes. Standing water, soil erosion, and foundation moisture issues affect thousands of North Texas properties, particularly those with irregular grading, low-lying areas, or inadequate existing drainage systems.

Keathley's certification through NDS (National Diversified Sales), a leading drainage products manufacturer, ensures adherence to industry best practices and access to advanced drainage technologies. This certification distinguishes the company as a qualified drainage specialist capable of designing and implementing complex water management systems that integrate seamlessly with existing landscape features.

"Every property presents unique drainage challenges that require customized solutions," added Keathley, also a NDS Certified Drainage Contractor. "Our approach emphasizes thorough assessment, quality materials, and proven installation techniques that deliver lasting results. We focus on solving drainage problems permanently rather than offering temporary fixes that fail during the next heavy rainfall."

The expanded drainage services complement Keathley Landscaping's existing portfolio of outdoor solutions, including natural and modern stonework, retaining walls, outdoor living spaces, and flowerbed borders. This integrated approach allows property owners to address multiple landscape needs through a single contractor familiar with North Texas soil conditions and climate challenges.

Beyond drainage services, the company continues to provide sod installation, landscape lighting, fence repair and installation, patio covers, outdoor kitchens, fire pits, and tree services. The combination of drainage expertise with comprehensive landscaping capabilities enables the creation of outdoor environments that manage water effectively while enhancing property value.

Keathley Landscaping has served the Dallas metropolitan area since 2002, establishing a reputation for practical solutions and quality workmanship. The company serves Dallas, Garland, Wylie, Plano, Rockwall, and surrounding communities throughout North Texas, providing residential property owners with professional landscaping and drainage solutions designed to withstand regional environmental challenges.
