

Keathley Landscaping Expands Yard Drainage and Retaining Wall Services Across North Texas

December 17, 2025

GARLAND, TX - December 17, 2025 -
Keathley Landscaping has expanded its residential drainage and retaining wall services to address the increasing demand for professional water management solutions throughout North Texas communities. The Dallas-based landscape contractor now offers comprehensive drainage system design and installation services, including French drain implementation, advanced grading solutions, channel drain systems, and custom-designed buried drainage pipes.

The expansion comes as homeowners across the region face mounting challenges from seasonal rainfall patterns and clay soil conditions that create persistent water management issues. These drainage problems can lead to costly property damage that typically falls outside standard homeowner insurance coverage, making professional drainage solutions essential for protecting residential investments.

As a certified NDS drainage contractor, the company brings specialized expertise to complex water management challenges that affect properties throughout the Dallas-Fort Worth metroplex. The certification

through National Diversified Sales, a leading drainage products manufacturer, ensures adherence to industry best practices and provides access to advanced drainage technologies for residential applications.

"Property owners often underestimate the damage that poor drainage can cause until they face foundation issues, landscape erosion, or water intrusion into their homes," said Logan Keathley, owner of Keathley Landscaping. "Our expanded drainage services provide practical, cost-effective solutions that protect properties while maintaining the aesthetic appeal of outdoor spaces. We combine technical expertise with an understanding of how drainage systems must integrate with existing landscape features."

The company's drainage services complement its established retaining wall installations, creating comprehensive water management systems that both redirect water flow and prevent soil erosion. Retaining walls serve dual purposes in landscape design, providing structural support for sloped properties while enhancing visual appeal through natural stonework or modern paver designs.

Beyond drainage solutions, the expanded service offerings include outdoor living space construction, featuring outdoor kitchens, fireplaces, and fire pits designed for North Texas weather conditions. The company also specializes in flowerbed borders, hardscape surfaces, and both natural and modern stonework installations that enhance property values while addressing functional landscape needs.

For properties requiring yard drainage Allen Texas residents can now access professional assessment and installation services that address the unique soil and topography challenges of the area. The company's approach involves thorough site evaluation to identify water flow patterns, soil composition analysis, and custom drainage design that prevents future water accumulation issues.

"Every property presents unique drainage challenges based on its grading, soil type, and surrounding landscape features," added Keathley. "Our certification and experience allow us to develop innovative solutions for even the most complex drainage problems, ensuring long-term protection for our clients' properties."

Keathley Landscaping has served the Dallas-Fort Worth area since 2002, providing landscape design, installation, and maintenance services to residential properties. The company specializes in comprehensive outdoor transformations, from sod installation and landscape lighting to fence repair and tree services. Their service area encompasses Dallas, Garland, Wylie, Plano, Richardson, Rockwall, and surrounding North Texas communities.
