

daylight AG Software Company Enhances Educational Technology Solutions for Swiss Institutions in Winterthur

November 24, 2025

Winterthur, ZH - November 24, 2025 -
daylight AG, a leading educational technology provider based in Winterthur, Switzerland, continues to strengthen its position as a comprehensive software solutions provider for educational institutions across the country. The company's integrated platform combines school administration, course management, examination processing, event coordination, and accounting operations into a unified system designed specifically for the education sector.

The Swiss software company has refined its modular platform to address the growing demand for digital transformation in educational institutions. Educational organizations throughout Switzerland are increasingly seeking streamlined administrative solutions that allow them to focus more resources on student success and learning outcomes rather than manual administrative tasks. More can be found at the company's profile at https://pressadvantage.com/organization/daylight-ag/.

The comprehensive software suite offered by daylight AG encompasses multiple critical functions for educational organizations. The platform includes people and address management capabilities, registration management systems, resource management and disposition tools, integrated accounting features, and marketing and customer relationship management functionality. Additionally, the system enables institutions to create online portals or e-shops for their educational programs, complete with automated processes for registration, confirmation, and payment processing.

One of the distinguishing features of the daylight AG platform is its flexibility in deployment options. Educational institutions can choose between on-premises installation or cloud-based service delivery, allowing the software to integrate seamlessly into existing IT infrastructure while adapting to individual organizational needs and processes. This flexibility has proven particularly valuable for institutions with varying technical capabilities and infrastructure requirements.

The company's software solutions also feature robust integration capabilities with leading financial applications, ensuring that educational institutions can maintain their existing financial workflows while benefiting from enhanced administrative capabilities. This interoperability reduces the learning curve for staff and minimizes disruption during implementation.

Based at Bahnhofplatz 12 in Winterthur, daylight AG has established itself over more than two decades as a trusted technology partner for Swiss educational institutions. The company's commitment to developing user-friendly, efficient digital tools reflects the evolving needs of modern educational organizations that must balance administrative efficiency with educational excellence. The company's location can be found at https://maps.app.goo.gl/FYDvnuHbdtTgjGRaA.

The ongoing digital transformation in education has accelerated the adoption of comprehensive management platforms like those offered by daylight AG. As educational institutions continue to modernize their operations, the demand for integrated, scalable solutions that can handle multiple administrative functions within a single platform continues to grow.

daylight AG specializes in providing comprehensive software solutions for educational institutions, offering integrated systems for school administration, course management, examination processing, event coordination, and accounting operations. The company serves educational organizations throughout Switzerland with customizable, scalable technology solutions designed to enhance administrative efficiency and support educational excellence.
