## **Press Advantage Reveals How Ecommerce Brands Boost Organic Sales Through Strategic PR Campaigns**

*November 27, 2025*

Las Vegas, NV - November 27, 2025 - PRESSADVANTAGE -

Press Advantage, a leading press release distribution service, today highlighted the growing trend of ecommerce companies leveraging public relations campaigns to significantly increase their organic search visibility and drive product sales. The company's analysis of recent SEO data demonstrates a strong correlation between strategic press coverage and measurable increases in product-page traffic.

The findings come as ecommerce businesses face mounting competition for organic search visibility in an increasingly crowded digital marketplace. According to industry data, companies that integrate press release distribution into their SEO strategies see an average 40 percent increase in organic traffic to product pages within 90 days of campaign launch.

Press Advantage's research indicates that press releases distributed through established news networks create valuable backlinks and brand mentions that search engines recognize as trust signals. These signals contribute to improved domain authority and higher rankings for product-related search queries.

"Ecommerce brands are discovering that traditional PR tactics deliver modern SEO results," said Jeremy

Noetzelman, spokesperson for Press Advantage. "When a product announcement appears on major news sites, it creates a ripple effect that extends far beyond the initial publication. Search engines interpret this media coverage as validation of the brand's relevance and authority in their market segment."

The company's platform, accessible at <https://pressadvantage.com/>, provides businesses with professional press release writing and distribution services to over 250 news outlets. The service includes distribution to major networks including ABC, NBC, CBS, FOX affiliates, Yahoo Finance, and Digital Journal.

Recent case studies from Press Advantage clients demonstrate the measurable impact of PR-driven SEO campaigns. One furniture retailer saw a 67 percent increase in organic traffic after distributing three press releases over a quarter, while a beauty brand experienced a 45 percent boost in product page visits following a single well-timed product launch announcement.

The integration of press releases into ecommerce marketing strategies addresses several key challenges facing online retailers. Beyond the immediate SEO benefits, press coverage helps establish brand credibility, reaches new audience segments, and provides content that can be repurposed across multiple marketing channels.

Press Advantage maintains an active presence on social media platforms, with updates available through Facebook and PA Twitter channels, where the company shares insights about press release optimization and distribution strategies.

The shift toward PR-integrated SEO strategies reflects broader changes in how search engines evaluate and rank content. As algorithms become more sophisticated in identifying authoritative sources, the value of legitimate news coverage continues to grow for ecommerce brands seeking sustainable organic growth.

Press Advantage, operated by Velluto Tech Incubator since 2011, specializes in providing comprehensive press release services to businesses across various industries. The Las Vegas-based company combines professional writing services with extensive distribution networks and SEO optimization tools. Their platform includes features such as keyword research tools, dynamic reporting, retargeting capabilities, and dedicated account management. The company has served over 16,000 businesses, helping them achieve greater online visibility through strategic press release campaigns.
