

Marry Thailand Unveils Integrated Wedding Planning and Legal Support Platform for International Couples

November 28, 2025

BANGKOK, THAILAND - November 28, 2025 -
Marry Thailand has introduced a comprehensive wedding planning and legal services platform designed specifically to help international couples navigate the complex marriage requirements and cultural considerations when planning weddings in Thailand. The integrated service combines traditional wedding planning expertise with specialized legal support through parent company Siam Legal International, creating a unified solution for couples planning weddings in Thailand. This expanded support reflects the growing demand from foreign and Thai couples seeking to marry in Thailand, who require both ceremony coordination and legally compliant documentation.

The platform represents a significant development in Thailand's destination wedding industry by offering couples a single point of contact for both ceremonial planning and legal documentation. With Thailand hosting thousands of international weddings annually, foreign couples often face challenges understanding local marriage laws, obtaining proper documentation from embassies, and ensuring their union will be recognized in their home countries.

"International couples planning to marry in Thailand typically encounter a maze of legal requirements that vary significantly depending on their nationalities and home country regulations," said Pratanponn Chotenukul, Managing Director of Marry Thailand. "By combining our wedding planning expertise with Siam Legal's two decades of legal experience, we can guide couples through every aspect of their Thailand wedding, from selecting the perfect beachfront venue to ensuring all marriage documents meet both Thai and international standards."

The service addresses a critical gap in the market where traditional wedding planners often lack the legal expertise to handle international marriage documentation, while law firms typically do not offer event planning services. Marry Thailand bridges this divide by providing wedding consulting, full-service planning, legal document preparation, visa assistance, customized wedding packages, and destination planning across popular Thai locations, including Phuket, Samui, Pattaya, Hua Hin, Chiang Mai, and Bangkok.

A key component of the platform involves helping couples understand and fulfill Thailand marriage requirements for foreigners, which can include obtaining affidavits from embassies, translating documents, drafting prenuptial agreements under Thai law, and registering marriages with both Thai authorities and foreign governments. The service also extends to immigration matters, assisting with Thai marriage visas and spousal visa applications for various countries, including the United States, United Kingdom, Australia, Canada, and Schengen Area nations.

The platform offers various wedding ceremony options to accommodate diverse cultural preferences, including traditional Thai ceremonies, Western-style weddings, Christian services, secular celebrations, Chinese weddings, and Muslim ceremonies. Each package can be customized to incorporate elements from multiple traditions, reflecting the increasingly multicultural nature of international marriages.

Beyond the ceremony itself, Marry Thailand's team manages vendor relationships, venue negotiations, decoration arrangements, and cultural elements such as the traditional Thai dowry custom when applicable. The bilingual consultants on staff help bridge communication gaps and ensure that both partners' families feel comfortable with the arrangements despite potential language and cultural differences.

Marry Thailand operates as a specialized division of Siam Legal International, leveraging over 22 years of experience in Thai legal services and immigration law. The company has facilitated thousands of international marriages, combining local expertise with a comprehensive understanding of international documentation requirements to ensure smooth, legally compliant wedding celebrations across Thailand.
