

Go Industries Inc Expands Commercial Grille Guard Line with Enhanced Winch Integration Systems

December 03, 2025

Richardson, TX - December 03, 2025 -
Go Industries Inc, a Texas-based manufacturer of heavy-duty truck accessories, has expanded its commercial-grade winch grille guard offerings to meet increasing demand from fleet operators and commercial truck owners across North America. The expansion introduces enhanced modular systems that combine front-end protection with integrated winch mount capabilities for heavy-duty commercial applications.

The expanded product line features modular-style grille guards that serve as a foundation for adding winch carriers and brush guards, providing flexibility for various commercial applications. Each Go Industries grille guard is constructed from 5/16-inch laser-cut steel uprights and 2.5-inch 16-gauge steel cross tubes, delivering substantial protection for commercial vehicles operating in demanding environments.

"The expansion of our winch grille guard line reflects the evolving needs of commercial truck operators who require integrated solutions that combine multiple functionalities," said a Go Industries spokesperson. "Our

modular approach allows fleet managers to customize their truck safety equipment based on specific operational requirements while maintaining the durability and protection standards our customers expect."

The enhanced winch system accommodates both 9.5 and 16.5 winch carriers, providing versatility for different commercial applications ranging from construction and utility work to emergency response vehicles. The modular design enables operators to add optional brush guards that complement vehicle lines while creating additional protection for the headlight area from road debris and off-road brush.

Installation efficiency has been prioritized in the expanded product line. Each unit includes custom heavy-duty mounting brackets designed for maximum strength and simplified installation, reducing downtime for commercial fleet operators. The mounting system has been engineered to maintain structural integrity while accommodating the additional stress loads associated with winch operations.

The expansion comes as commercial trucking companies increasingly seek integrated solutions that enhance both vehicle protection and operational capabilities. The enhanced products complement Go Industries' existing portfolio of truck protection equipment, including headache racks, bumper replacements, air flow tailgates, and mudguards.

All components in the expanded winch system line are manufactured in the United States at Go Industries' Texas facilities. The products are backed by a three-year warranty covering materials, workmanship, and finish, providing commercial operators with confidence in their investment.

Go Industries Inc has been serving the truck accessories market since 1978, developing specialized equipment for commercial vehicles, law enforcement applications, and custom manufacturing projects. The company maintains Platinum Status with SEMA, reflecting its commitment to quality and innovation in the automotive aftermarket industry. The company's product portfolio includes front and back-end protection systems, specialized law enforcement equipment, and custom manufacturing capabilities for unique commercial applications.
