

didlogic Announces Opening of New Headquarters in Larnaca, Cyprus

December 02, 2025

NEW YORK, NY - December 02, 2025 -
didlogic, a global provider of SIP trunking, DID numbers, and enterprise VoIP services, announced the opening of its new headquarters in Larnaca, Cyprus. The event marked a significant milestone for the company as it continues to expand its global presence and strengthen its commitment to serving customers and partners across key international markets.

The official opening brought together employees, partners, and members of the leadership team for a celebration that highlighted both the symbolic and practical importance of the new space. According to the company, the new headquarters represents more than a physical expansion. It reflects didlogic?s long term commitment to growth, connection, and operational excellence.

Larnaca was strategically selected as the location for the new headquarters due to its pivotal geographic position, acting as a natural gateway connecting the continents of Europe, the Middle East, and Africa.

This key location offers DIDlogic distinct advantages, including unparalleled access to a highly diverse pool of international talent. Furthermore, the establishment of the central hub in Larnaca facilitates direct engagement with critical international markets across these three regions.

The company's decision was also significantly influenced by Larnaca's increasingly dynamic and supportive business environment. Having this central operational base in the heart of the region allows DIDlogic to foster closer relationships with the various communities and people it serves, ensuring quicker responsiveness and a deeper understanding of regional needs. This centralized approach is fundamental to the company's commitment to supporting its clientele across this expansive tri-continental area.

During the opening ceremony, didlogic CEO Alex Kloc shared the significance of the new headquarters: ?This new office is not just a symbol of growth. It is a promise. It reflects our belief in staying close to our people, close to our customers, and close to the challenges we help them solve. In telecom, distance is something we overcome every day, but proximity is what allows us to understand and deliver with purpose.?

The new workspace was designed to support collaboration, creativity, and transparency. According to the company, the office layout encourages cross functional teamwork that drives innovation across didlogic?s product lines, including cloud infrastructure, carrier grade voice solutions, and global communication services. Leadership emphasized that the environment was built with people at the center, with open spaces, natural light, and areas designed specifically for idea sharing.

The strategic decision to establish the new headquarters in Larnaca, Cyprus, is a direct reflection of didlogic's deeply ingrained corporate ethos. This move is not just a geographical expansion but a physical manifestation of the company's core values: a dedication to simplicity, an unwavering focus on customer centricity, a mandate for operational clarity, and a fundamental commitment to enabling meaningful human connection.

This significant expansion serves to powerfully reinforce didlogic's overarching mission: to radically simplify global communication. By planting a new flag in a key international hub like Larnaca, didlogic is strategically positioning itself to better serve and provide more accessible communication solutions for a diverse global clientele. This clientele includes large-scale enterprises, established carriers, and the rapidly growing, fast-paced companies that are shaping the future of global business. The new headquarters will act as a central nexus to enhance service delivery, foster innovation, and drive the development of new solutions that make connecting the world easier, faster, and more efficient for everyone involved.

didlogic views the new location as the beginning of a new chapter rather than a final milestone. The team is preparing for further growth, new initiatives, and additional opportunities to expand the company?s global impact. Leadership described the headquarters as a launch point for future innovation supported by a rapidly

growing international workforce.

?This milestone reflects what we stand for as a company,? Kloc said. ?Technology should bring people closer, not simply connect networks. Being here in the heart of the Mediterranean allows us to strengthen the relationships that move our industry forward. We look forward to the new ideas, bold goals, and continued growth that will come from this next chapter.?
