SKIN Clinics Announces Availability of Lip Filler Services Across More Calgary Neighbourhoods

December 01, 2025

December 01, 2025 -
SKIN Clinics has announced the expansion of its lip filler services to several additional neighbourhoods throughout Calgary. The clinic, known for its medical leadership and client-focused approach, now offers access to these procedures for residents in Marda Loop, Bank View, Strathcona, Signal Hill, Aspen, West Springs, Spruce Cliff, and Rosscarrock. This development aligns with SKIN Clinics? effort to provide regulated and professionally administered cosmetic services across the city.

Lip filler treatments at SKIN Clinics are conducted by licensed professionals with specific training in aesthetic injection techniques. These procedures use hyaluronic acid-based substances that are designed to support the appearance of volume, shape, and balance in the lips. Each treatment is informed by a comprehensive consultation process that considers facial structure, medical history, and client expectations. All injections are carried out in a medically supervised setting that adheres to established protocols for safety, hygiene, and documentation.

The clinic?s leadership includes Dr Jason Sneath, a board-certified dermatologist who oversees the delivery of care across multiple SKIN Clinics locations. Under his direction, the lip filler service in Calgary follows uniform protocols designed to ensure consistency, minimize risk, and support predictable outcomes. This includes evaluation prior to treatment, careful product selection, measured application, and client education throughout the process.

Lip fillers are often chosen by individuals who are seeking to restore volume lost with age or to refine the shape of their lips for aesthetic balance. Each client begins the process with a clinical consultation in which a practitioner conducts a thorough skin and facial assessment. The consultation also includes a review of any relevant medical conditions, allergies, or medications to confirm eligibility for the procedure. Once the assessment is complete and the client has consented, treatment may be scheduled on the same day or at a later appointment, depending on availability and client preference.

The injectable filler used at SKIN Clinics is a hyaluronic acid gel, a substance found naturally in the body that

allows for gradual and reversible enhancement. The product is applied using sterile instruments, with topical numbing agents available to assist with comfort. Each application is adapted to the individual's natural lip contour to ensure proportional and subtle results. The procedure is typically completed within 30 to 45 minutes and requires no incisions or general anesthesia.

Following treatment, clients receive detailed post-procedure instructions regarding swelling, hydration, and aftercare. Most individuals resume normal activity within a few hours, although minor swelling or sensitivity may persist briefly. The duration of the visible effect varies by individual but typically lasts several months. The clinic schedules follow-up consultations when needed to evaluate progress or to address any questions that may arise after the procedure.

Dr. Jason Sneath, the local owner of SKIN Clinics Calgary, highlighted the expansion as part of a broader response to increasing interest in medically directed aesthetic services across Calgary?s growing neighborhoods. According to Dr. Jason Sneath, providing local access to these services ensures that clients can receive professional care without needing to travel long distances or rely on non-clinical providers.

Appointments are now available at the Calgary clinic located on the third floor of the Spider Building along 14th Street SW. The facility includes designated consultation spaces, procedural rooms, and support amenities to ensure privacy, efficiency, and comfort throughout the visit. Clients are seen by appointment only, with scheduling options offered on weekdays and select Saturdays. All services are preceded by consultation and informed consent, and medical records are maintained as part of the clinic?s standard care protocol.

SKIN Clinics was established in 2014 and has expanded to several cities across Alberta, Manitoba, and Saskatchewan. The organization operates exclusively under physician-led management and offers aesthetic and dermatologic services that align with current standards in the field. Staff members undergo ongoing training and remain updated on clinical techniques and safety practices relevant to cosmetic injections.

The decision to extend the availability of lip filler services reflects changes in client preference toward procedures that do not require surgery or extended recovery. Data from the aesthetic field shows that minimally invasive treatments continue to grow in popularity, particularly among individuals looking for subtle refinements without altering their natural features. By offering these services in neighbourhoods beyond the city center, SKIN Clinics aims to meet the needs of a broader demographic while maintaining its clinical standards.

All prospective clients are required to complete an initial consultation prior to treatment. During this meeting, the clinician will determine suitability, answer any questions, and provide realistic expectations based on anatomy and product characteristics. Clients are encouraged to raise any concerns before beginning

treatment, and practitioners are trained to provide detailed guidance throughout each step of the process.

Residents in the listed Calgary neighbourhoods can now contact the clinic by phone or through the SKIN Clinics website to schedule a consultation. All services are delivered in accordance with medical regulations, and no walk-in appointments are accepted for cosmetic procedures. The clinic maintains a policy of structured follow-up to support safe outcomes and client confidence in the services received.
