

West Coast Tire & Services Expands Auto Repair Services to San Clemente Market

December 15, 2025

San Juan Capistrano, CA - December 15, 2025 - PRESSADVANTAGE -

West Coast Tire & Services, a certified GoodYear Auto Service Center based in San Juan Capistrano, has announced the expansion of its automotive repair and maintenance services to serve customers in San Clemente, California. The expansion represents the company's continued growth in South Orange County, where it has provided professional automotive services since 2006.

The expansion enables San Clemente residents to access the same comprehensive automotive services that have established the company's reputation throughout the region. West Coast Tire & Services offers complete auto repair, diesel maintenance, factory-scheduled maintenance, and tire services at competitive prices compared to dealership alternatives. The company's ASE-certified technicians utilize state-of-the-art diagnostic equipment to service both foreign and domestic vehicles.

"Our expansion into San Clemente reflects our commitment to making professional automotive care more accessible and affordable throughout South Orange County," said Todd, owner of West Coast Tire &

Services. "We've built our reputation on providing dealership-quality service without the dealership prices, and we're excited to bring that same value proposition to San Clemente residents."

As a certified Good Year San Juan Capistrano dealer, the company maintains access to premium tire inventory and manufacturer-backed warranties while offering the personalized service of a local business. The expansion comes as automotive service costs continue to rise at dealerships, prompting more vehicle owners to seek alternative service providers that can deliver quality maintenance and repairs at more reasonable rates.

The company's service offerings encompass a wide range of automotive needs, including engine rebuilding, suspension repair, brake service, radiator repair, fuel injector cleaning, wheel balancing, and air conditioning repair. Additionally, the shop provides specialized diesel repair services, including lift kit installations and custom wheel and tire packages for diesel vehicles.

"We understand that vehicle maintenance and unexpected repairs can strain household budgets, which is why we've structured our pricing to be significantly more competitive than dealership rates," added Todd. "Our technicians have the same certifications and use the same diagnostic technology as dealerships, but our overhead allows us to pass substantial savings on to our customers."

The company offers financing options and works with extended warranty providers to help customers manage repair costs. Their factory maintenance schedule services help vehicle owners maintain manufacturer warranties while avoiding premium dealership service pricing.

West Coast Tire & Services has operated as a full-service automotive repair facility in San Juan Capistrano since 2006. The company holds certification as a GoodYear Auto Service Center Tire Dealer and employs ASE-certified technicians trained in the latest automotive technology. The business specializes in providing comprehensive automotive services for both gasoline and diesel vehicles, offering everything from routine maintenance to major engine repairs. Their commitment to transparent pricing and professional service has established them as a trusted alternative to dealership service departments throughout South Orange County.
