

Courtesy Care Restoration Achieves IICRC Certification Status for Enhanced Restoration Services

December 02, 2025

BARTLESVILLE, OK - December 02, 2025 - PRESSADVANTAGE -

Courtesy Care Restoration, a leading restoration services provider serving northeastern Oklahoma, has achieved Institute of Inspection, Cleaning and Restoration Certification (IICRC) status, reinforcing its commitment to delivering industry-standard restoration services to residential and commercial clients throughout the region.

The IICRC certification represents the highest standard in the restoration industry, requiring extensive training, adherence to strict protocols, and demonstrated expertise in restoration best practices. This achievement positions the company among an elite group of restoration professionals who meet rigorous industry standards for water damage restoration, fire and smoke damage restoration, mold remediation, and other critical restoration services.

"Achieving IICRC certification reflects our ongoing dedication to excellence and our commitment to providing our clients with the highest quality restoration services," said Allen Birtk of Courtesy Care Restoration. "This

certification validates our team's expertise and ensures that every project we undertake meets or exceeds industry standards for safety, efficiency, and effectiveness."

The IICRC certification process involves comprehensive training in the latest restoration techniques, equipment usage, and safety protocols. Certified firms must demonstrate proficiency in moisture detection, structural drying, antimicrobial application, and documentation procedures essential for successful restoration projects. The certification also requires ongoing education to stay current with evolving industry standards and technological advances.

With over 40 years of experience in water damage repair, the locally owned and operated company has built a reputation for rapid response and thorough restoration services. The firm provides 24/7 emergency services across multiple communities including Coffeyville, Collinsville, Grove, Independence, Nowata, Owasso, Pawhuska, Sand Springs, and Vinita.

The certification comes at a critical time when property owners increasingly seek qualified professionals to handle complex restoration challenges. Water damage, in particular, requires immediate and expert attention to prevent secondary issues such as mold growth and structural deterioration. IICRC-certified firms follow established protocols that ensure all affected areas are properly assessed, dried, and restored to pre-loss conditions.

"Our IICRC certification gives property owners peace of mind knowing that their restoration project is being handled by trained professionals who understand the science behind proper restoration," added Birk. "From initial assessment through final reconstruction, our certified technicians follow proven methodologies that minimize damage and accelerate recovery."

The company's comprehensive service offerings include water damage restoration, fire and smoke damage restoration, mold remediation, trauma scene cleanup, air duct cleaning, disinfecting services, crime scene cleanup, biohazard cleanup, and reconstruction and rebuilding services. As an insurance-approved and preferred provider, the firm works directly with insurance companies to streamline the claims process for property owners.

Courtesy Care Restoration maintains full licensing, bonding, and insurance coverage, providing additional protection and assurance to clients. The company continues to invest in advanced training and education for its technicians, ensuring they remain at the forefront of restoration technology and techniques. This commitment to continuous improvement enables the firm to handle increasingly complex restoration challenges while maintaining the highest standards of service quality and customer satisfaction.
