

AISOL CH LLC Highlights Outpatient Treatment Programs as Essential Bridge to Sustained Recovery

December 22, 2025

CHERRY HILL, NJ - December 22, 2025 -
AISOL CH LLC, operating All In Solutions Counseling Center Cherry Hill, emphasizes the critical role of outpatient programs in helping individuals maintain long-term recovery from substance abuse. The Joint Commission-accredited facility offers comprehensive outpatient services designed to support clients as they transition from intensive clinical care to independent living while maintaining therapeutic support.

The center's approach recognizes that while detoxification and residential treatment provide essential foundations for recovery, many individuals achieve lasting success through structured outpatient programs that allow them to practice recovery skills in real-world settings. All In Solutions Counseling Center Cherry Hill provides three distinct levels of outpatient care: Partial Hospitalization Programs (PHP), Intensive Outpatient Programs (IOP), and standard outpatient services, each tailored to meet clients at their specific stage of recovery.

"Outpatient care gives clients the chance to apply recovery tools in real life while staying connected to

professional and peer support. At All In Solutions Counseling Center Cherry Hill, we provide structure and flexibility, helping clients practice independence while keeping recovery first," said Shannon Donnachie, Clinical Program Manager, LSW.

All In Solutions Counseling Center Cherry Hill in South Jersey integrates evidence-based treatment modalities across all outpatient levels, including individual therapy, group counseling, family therapy programs, and specialized tracks for trauma-focused care. The facility also incorporates medication-assisted treatment when clinically appropriate, combining pharmaceutical interventions with behavioral therapies to address both the physical and psychological aspects of addiction.

The Partial Hospitalization Program serves as an intermediate step for clients transitioning from residential treatment, offering intensive therapeutic intervention while allowing participants to return home each evening. This program typically involves five to six hours of treatment daily, providing comprehensive clinical support without requiring overnight stays. The Intensive Outpatient Program offers greater flexibility, meeting three to four times weekly for several hours per session, enabling clients to maintain employment, education, or family responsibilities while receiving substantial therapeutic support.

Beyond traditional therapeutic interventions, the center offers complementary services including art therapy, yoga therapy, and faith-based programming options. These additional components provide clients with diverse tools for managing stress, processing emotions, and building resilience. The facility also maintains robust alumni programs that extend support beyond formal treatment completion, recognizing that recovery is an ongoing process requiring sustained community connection.

The structured nature of All In Solutions Counseling Center Cherry Hill outpatient programs provides essential accountability measures that help clients maintain their recovery momentum. Regular therapy sessions, peer support groups, and ongoing clinical assessments create a framework that supports individuals as they navigate the challenges of early recovery while rebuilding their lives. This balanced approach allows clients to test their coping strategies in real-world situations while maintaining access to professional guidance and intervention when needed.

AISOL CH LLC has provided addiction treatment services for over a decade, serving clients throughout New Jersey and the surrounding region. The facility's location near Philadelphia and Trenton makes it accessible to individuals seeking quality outpatient addiction treatment. The center treats various substance use disorders, including alcohol addiction, opioid dependency, stimulant abuse, and prescription medication addiction, utilizing individualized treatment planning to address each client's unique circumstances and recovery goals.
