Cornerstone Builders Custom Homes & Remodeling Introduces Home Remodeling Services in Beaverton, Oregon

December 05, 2025

BEAVERTON, OR - December 05, 2025 -
Cornerstone Builders Custom Homes & Remodeling introduces its comprehensive suite of home construction and remodeling services to meet growing demand for residential renovations and custom home projects throughout Beaverton, Oregon and Washington County.

The Beaverton-based contractor offers specialized services, including accessory dwelling unit construction, kitchen and bathroom renovations, basement remodeling, home additions, and whole home transformations. The company maintains Certified Aging-in-Place Specialist credentials through the National Association of Home Builders, enabling the team to design and execute home modifications that enhance accessibility for residents of all ages.

"Homeowners throughout Washington County are seeking professional contractors who can manage complex renovation projects from initial design through final construction," said Allen Tankersley, president and lead designer at Cornerstone Builders. "Our integrated approach combines architectural design, permit acquisition, and construction management under one roof, streamlining the renovation process for property owners."

The company's service portfolio addresses diverse residential construction needs. ADU construction services encompass architectural planning, permit processing, foundation work, utility connections, and interior finishing. Kitchen remodeling projects include cabinetry installation, countertop selection, appliance integration, and layout optimization. Bathroom renovation services cover fixture installation, space planning, and material selection.

Cornerstone Builders Reviews reflect the company's track record of completing projects within established timelines and budgets. The firm maintains general contractor licensing through the Oregon Construction Contractors Board and carries required insurance coverage for residential construction projects in Oregon.

Basement remodeling transforms underutilized spaces into functional living areas, while home addition services expand existing structures with seamlessly integrated new construction. The firm's whole home remodeling capabilities allow for complete residential transformations that update both interior and exterior elements.

The company employs a design-build methodology that consolidates project management, design services, and construction execution. This approach reduces coordination challenges typically associated with managing multiple contractors and ensures consistent communication throughout the project duration.

Established in 2003, Cornerstone Builders has completed residential projects throughout Washington County, ranging from single-room renovations to complete custom home construction. The company's team includes licensed contractors, certified remodelers, and design professionals who collaborate to deliver residential construction solutions.

Information about Cornerstone Builders includes multiple awards from the National Association of the Remodeling Industry, covering categories such as residential kitchen remodeling, bathroom remodeling, and interior renovation projects. The company has also participated in the Oregon Home Structure + Style Awards program, receiving recognition for residential construction excellence.

The firm serves Beaverton, Hillsboro, and surrounding Washington County communities, providing construction and remodeling services for homeowners seeking to update, expand, or modify their properties. Current projects include kitchen renovations, bathroom updates, ADU installations, and comprehensive home remodeling initiatives across the service area.
