Renaissance Design and Construction Announces Expanded Services for Stafford and Sugar Land, TX

December 05, 2025

STAFFORD, TX - December 05, 2025 -
Renaissance Design and Construction, LLC announces the expansion of its comprehensive design-build services throughout the Greater Houston area, offering integrated architectural design and construction solutions for luxury home transformations. The company, which has grown from completing its first million-dollar project in 2019 to establishing a new corporate headquarters in 2024, now serves homeowners across Stafford, Sugar Land, Richmond, Katy and surrounding communities.

The expansion comes as demand for high-end residential remodeling continues to rise throughout the Houston metropolitan area. Renaissance Design and Construction specializes in transforming existing residences into custom luxury estates through comprehensive interior and exterior renovations, kitchen and bathroom remodeling, home additions, and outdoor living construction.

"The Greater Houston market has shown tremendous appetite for sophisticated home transformations that go beyond simple renovations," said Kimberly Degner, founding partner of Renaissance Design and Construction. "Our integrated approach combines architectural expertise with construction excellence under one roof, eliminating the coordination challenges that often plague traditional remodeling projects. This allows us to deliver seamless transformations that reflect each client's unique vision while maintaining efficiency and quality throughout the process."

The company's design-build model merges expert construction capabilities with architectural and interior design services, providing clients with a single point of contact throughout their project. This approach has proven particularly effective for complex renovations that require careful coordination between design intent and construction feasibility.

Renaissance Design and Construction's service portfolio encompasses whole-home renovations that completely reimagine existing spaces, custom kitchen designs featuring premium materials and professional-grade appliances, spa-inspired bathroom transformations with top-tier finishes, structural home additions that seamlessly blend with existing architecture, and sophisticated outdoor living spaces including

patios, outdoor kitchens, and custom pergolas.

The company's rapid growth trajectory reflects its commitment to craftsmanship and client relationships. After establishing operations in 2019, Renaissance Design and Construction completed its first million-dollar new construction project within its inaugural year. The company opened its corporate office in 2023 and expanded into its current Stafford facility in 2024, positioning itself to better serve the growing demand for luxury home transformations throughout the region.

About Renaissance Design and Construction

Renaissance Design and Construction, LLC is a full-service design-build contractor specializing in luxury home transformations throughout the Greater Houston metropolitan area. Founded in 2019, the company combines architectural design, interior design, and construction expertise to deliver comprehensive renovation solutions. The firm's integrated approach ensures seamless project execution from initial concept through final construction, with a focus on transparency, quality craftsmanship, and customer satisfaction. The company maintains its headquarters in Stafford, Texas, and serves residential clients throughout Sugar Land, Richmond, Katy, and surrounding communities.
