RPM Announces Availability of Plate Compactor Rubber Mounts

December 04, 2025

Burlington, Newfoundland and Labrador - December 04, 2025 -
RPM Industrial Rubber Parts, a trusted provider of heavy-duty rubber components for a variety of heavy industries, today announces the availability of high-quality rubber mounts for plate compactors. These rubber mounts are designed to absorb vibrations , enhancing the performance and longevity of equipment used in construction and landscaping industries. By offering a reliable OEM option, RPM Industrial Rubber Parts reinforces its commitment to professionals seeking dependable components for their machinery.

Shear mounts are critical parts in plate compactors, as they help to minimize the intensity of vibrations generated by the engine as it operates. These mounts not only ensure optimal operation but also extend the equipment's lifespan, making them a sound investment for businesses. With the introduction of these rubber mounts, RPM caters to an increasing demand for robust and durable machinery solutions.

RPM Industrial Rubber Parts plate compactors selection is specifically crafted to meet the rigorous demands of the construction environment. Made in partnership with Parker Lord, each mount adheres to stringent manufacturing standards, offering an exact fit for a variety of widely-used brands, including Caterpillar and Stanley. This collaboration guarantees that users receive mounts capable of withstanding the intense

challenges faced on job sites.

"Quality and reliability are at the core of what we do," said Mike McNeil, Vice President of RPM Industrial Rubber Parts. "Our replacement parts are designed to perform under the demanding conditions typical in compaction work, ensuring our customers receive the best possible solutions for their equipment needs."

RPM?s commitment to providing OEM replacement parts is evident in the quality of their products. Each rubber mount undergoes thorough testing to ensure it meets performance standards essential for construction applications. By offering these mounts, RPM aims to eliminate the frustration often associated with lower-quality alternatives that need frequent replacement.

The demand for high-performance rubber mounts continues to grow as industries prioritize efficiency and reliability. RPM understands the unique challenges faced by construction and landscaping companies, which is why it focuses on creating products that enhance machinery effectiveness over time. This proactive approach helps businesses maintain smooth operations while minimizing downtime.

"Investing in quality components assures longer service intervals and less downtime, making a significant difference for our customers," McNeil added. "We strive to offer products that our clients can trust, ensuring their equipment runs proficiently throughout its life cycle."

These rubber mounts are available for a range of popular plate compactor brands, including those from Allied, Dynapac, and Ingersoll Rand. RPM's extensive selection provides operators and contractors with a dependable source for parts that meet their specific needs. The availability of these components helps ensure that machinery continues to operate efficiently while also minimizing maintenance costs.

RPM Industrial Rubber Parts emphasizes its dedication to forming lasting partnerships with customers, prioritizing service and support alongside product quality. This customer-focused approach enhances its ability to supply vital parts that not only fit perfectly but also perform exceptionally in demanding environments. Companies can contact RPM for specific guidance on the right rubber mounts for their equipment.

The availability of new rubber mounts from RPM signifies a valuable resource for the construction industry seeking reliability and quality. With these components, users can expect a noteworthy improvement in their equipment's performance and longevity, reinforcing RPM?s position as a leading provider of essential rubber parts for the heavy machinery sector.
