

Keathley Landscaping Expands Custom French Drain Installation Services Across North Texas

December 23, 2025

GARLAND, TX - December 23, 2025 -
Keathley Landscaping has expanded its drainage solutions portfolio to address increasing water management challenges affecting residential properties throughout North Texas. The company now offers comprehensive french drain installation services alongside advanced grading solutions and custom-designed buried drainage systems to combat property damage caused by the region's clay soil conditions and seasonal rainfall patterns.

The expansion comes as homeowners across Dallas, Garland, Wylie, Plano, and Rockwall face mounting concerns about foundation damage and landscape deterioration due to inadequate drainage systems. Recent industry data indicates that water-related property damage claims have increased significantly across Texas, with many issues stemming from improper yard drainage that standard homeowner's insurance policies typically do not cover.

"Property owners often underestimate the damage that poor drainage can cause until they're facing

thousands of dollars in foundation repairs," said Logan Keathley, owner and NDS Certified Drainage Contractor at Keathley Landscaping. "Our expanded drainage services provide homeowners with professional solutions that protect their investments while maintaining the aesthetic appeal of their outdoor spaces."

As an NDS Certified Drainage Contractor, the company has implemented new drainage assessment protocols and installation techniques based on certification standards from National Diversified Sales, a leading drainage products manufacturer. This certification enables access to specialized drainage technologies and installation methodologies that meet current industry standards for residential water management.

The enhanced service offerings include comprehensive drainage assessments that identify problem areas and provide tailored recommendations based on soil conditions, slope angles, and water flow patterns. Each french drain installation receives customized design considerations to ensure seamless integration with existing landscape features while effectively managing water runoff.

"We've seen firsthand how proper drainage transforms properties from constantly waterlogged yards into functional outdoor living spaces," added Keathley. "Our approach combines technical expertise with practical solutions that work within each client's budget and landscape design preferences."

The drainage services complement the company's existing landscaping offerings, which include sod installation, natural and modern stonework, retaining walls and veneers, outdoor living spaces with kitchens and fire features, flowerbed borders, cedar fence installation, landscape lighting, patio covers, and tree services. This comprehensive service portfolio allows property owners to address both water management and aesthetic improvements through a single contractor.

The company's drainage solutions specifically address challenges unique to North Texas properties, including clay soil that prevents proper water absorption, seasonal rainfall patterns that overwhelm inadequate drainage systems, and topographical issues that direct water toward foundations rather than away from structures.

Keathley Landscaping has been serving the Dallas metropolitan area since 2002, providing landscape design, construction, and maintenance services to residential and commercial properties. The company maintains partnerships with industry manufacturers and continues to invest in training and certification programs to ensure installation methods meet evolving standards in water management and landscape construction.
