

STM Trucks & Machinery Continues Operations Across Three New South Wales Locations

December 08, 2025

December 08, 2025 -
STM Trucks & Machinery announced the continuation of its truck and machinery sales and service operations across three New South Wales locations. The company, formerly known as Sydney Trucks and Machinery, operates facilities in Smeaton Grange, Queanbeyan West, and Unanderra, providing commercial vehicle and equipment solutions throughout the region.

The business has maintained operations for more than 50 years and functions as a family-owned enterprise. STM's service areas include new and used truck sales, machinery sales, spare parts distribution, workshop services, and equipment maintenance. The company's headquarters operates from 20-26 Dunn Road in Smeaton Grange, Western Sydney.

"Our operations span truck sales, machinery distribution, parts supply, and service work across New South Wales," said a representative from STM Trucks & Machinery. "The company has operated in the commercial vehicle and equipment sector for five decades, and we continue to serve clients requiring trucks and machinery for business operations."

STM Trucks & Machinery maintains an inventory of new commercial vehicles from manufacturers including Iveco and Fuso. Machinery inventory includes equipment from Kobelco, D'avino, Merlo, and ASV. The company also maintains a stock of pre-owned trucks and machinery, with inventory updated on a regular basis as units are acquired and sold.

The parts division supplies components for multiple brands, including IVECO, International, FUSO, Kobelco, ASV, and Cummins. Parts inventory encompasses engine components, braking systems, electrical parts, and accessories. The company provides both genuine manufacturer parts and aftermarket alternatives. Parts not maintained in stock can be sourced through the company's supply network.

STM operates a parts delivery service twice daily throughout Metropolitan Sydney and provides afternoon delivery to the Southern Highlands and Wollongong regions. Customers can arrange parts pickup at any of the three locations. Expedited shipping arrangements are available for urgent parts requirements.

The company's workshop facility operates six days per week and accommodates large commercial vehicles, including B-Double configurations. Workshop services include routine maintenance, repairs, and installation work. The facility provides emergency repair services on a 24-hour basis. On-site service and repair work is available for equipment that cannot be transported to workshop locations.

"Workshop capacity for large vehicles addresses the needs of transport operators with semi-trailers and B-Double combinations," said the STM representative. "The facility's operating hours and emergency service availability are structured to minimise downtime for commercial operations."

The workshop facility includes customer amenities such as a waiting area, rest facilities, and courtesy vehicle access. Four courtesy vehicles are maintained for customer use during service appointments. The waiting area includes a television and refreshments for customers remaining on-site during service work.

STM provides maintenance services for trucks and machinery sold through its locations. Maintenance protocols are established based on manufacturer specifications and equipment usage patterns. Installation services are available for machinery purchases requiring setup and configuration prior to operation.

The company offers finance arrangements for truck and machinery purchases. Finance terms are determined on an individual basis following credit assessment and review of specific purchase requirements. The finance program includes on-site consultation services at customer locations.

Customisation services are available for commercial vehicles and transportation equipment. Modifications are performed to address specific operational requirements or industry applications. Customisation work is coordinated through the sales and service departments based on customer specifications.

STM's client base includes small business operators, landscaping companies, and tradespeople requiring commercial vehicles and equipment. The company serves customers throughout New South Wales, with primary service areas concentrated in the Greater Sydney region, Southern Highlands, South Coast, and the Australian Capital Territory periphery.

About STM Trucks & Machinery:

STM Trucks & Machinery, formerly operating as Sydney Trucks and Machinery, is a family-owned commercial vehicle and equipment provider established more than 50 years ago. The company operates three facilities across New South Wales, located in Smeaton Grange, Queanbeyan West, and Unanderra. STM provides truck sales, machinery distribution, spare parts supply, workshop services, and equipment maintenance to commercial clients throughout the Greater Sydney region, Southern Highlands, South Coast, and surrounding areas. The company maintains partnerships with vehicle manufacturers, including Iveco and Fuso, and machinery brands, including Kobelco, D'avino, Merlo, and ASV. STM's workshop facility operates six days per week and provides 24-hour emergency service availability. Additional information is available at stm.com.au or by contacting the company's Smeaton Grange headquarters at (02) 4647 4488.
