

Encore Data Products Announces Participation in 2026 TCEA Convention

December 12, 2025

LAFAYETTE, CO - December 12, 2025 - PRESSADVANTAGE -

Encore Data Products, a leading provider of audio and technology products for educational institutions, today announced its participation in the 2026 Texas Computer Education Association (TCEA) Convention scheduled for January 31 through February 4 in San Antonio, Texas.

The Lafayette, Colorado-based company will showcase its comprehensive range of educational technology solutions at the premier technology education event, continuing its tradition of supporting Texas educators with innovative classroom tools. The TCEA Convention brings together thousands of educators, administrators, and technology professionals to explore the latest developments in educational technology.

“Our participation in the TCEA Convention reflects our ongoing commitment to supporting educators with reliable, affordable technology solutions that enhance the learning experience,” said a representative from Encore Data Products. “This event provides an invaluable opportunity to connect directly with Texas educators and understand their evolving classroom technology needs.”

Encore Data Products will display its extensive catalog of educational technology products, including durable school headphones, headphones with microphones for interactive learning, charge and sync stations, document cameras, and various AV accessories designed specifically for classroom environments. The company's booth will also feature its clean and healthy supplies line, including electronic sanitizers and protective covers for shared audio equipment.

At this year's convention, Encore Data Products will feature its top-performing classroom headphones, including the AE-36, AC-204, and ST2BK models – trusted favorites among educators for testing environments, remote learning, and daily classroom use. Known for their durability, comfort, and clear audio performance, these models are specifically engineered to meet the rigorous demands of school settings while supporting engagement and focus during lessons and assessments.

The TCEA Convention represents one of the largest gatherings of education technology professionals in the Southwest, with attendees exploring solutions for digital learning, STEAM education, and classroom management. Information about the convention can be found at <https://convention.tcea.org/> where educators can register and view the complete schedule of events.

Encore Data Products has established itself as a trusted partner for schools seeking quality audio and technology solutions. The company's participation in major education conferences demonstrates its dedication to understanding and addressing the challenges faced by modern educators. Representatives will be available throughout the convention to discuss custom solutions for schools and districts of all sizes.

"We recognize that each educational institution has unique technology requirements, and events like the TCEA Convention allow us to showcase how our products can be tailored to meet specific classroom needs," added the representative. "From elementary schools requiring sturdy headphones for young learners to high schools implementing podcasting and esports programs, we provide comprehensive solutions."

Based in Lafayette, Colorado, Encore Data Products specializes in providing audio and technology products for schools, libraries, and businesses. The company offers an extensive range of products including headphones, AV technology, clean and healthy supplies, and various accessories. Their product line encompasses everything from basic classroom headphones to advanced systems for sports communication, language interpretation, and streaming applications. With a focus on durability, affordability, and educational value, Encore Data Products serves educational institutions nationwide. Additional information about their complete product catalog is available at <https://www.encoredataproductions.com/> where educators can explore solutions designed specifically for academic environments.
