Arrowhead Clinic Chiropractor Decatur Expands Walk-In Services for Auto Accident Injury Treatment

December 11, 2025

DECATUR, GA - December 11, 2025 - PRESSADVANTAGE -

Arrowhead Clinic Chiropractor Decatur has expanded its walk-in services to provide immediate care for patients suffering from auto accident injuries, addressing the critical need for accessible treatment in the hours and days following vehicular trauma.

The clinic, which operates Monday through Friday from 9 AM to 7 PM and Saturday from 9 AM to 2 PM, now accommodates walk in chiropractors services specifically designed for accident victims who require urgent musculoskeletal care. This expansion comes as the clinic responds to increasing demand from patients experiencing delayed onset symptoms from auto accidents, including whiplash, spinal misalignment, and soft tissue damage.

"Auto accident injuries often don't manifest immediately, which creates a dangerous window where patients may not realize they need treatment," said Dr. Edward Lewis, DC, at Arrowhead Clinic. "By expanding our walk-in availability, we're ensuring that patients can access specialized care the moment they recognize

symptoms, whether that's hours or days after their accident."

The Arrowhead Clinic location in Decatur Georgia has developed comprehensive protocols for treating the most common auto accident injuries, including neck and back pain, herniated discs, and muscle strains. The clinic's approach combines diagnostic imaging, spinal adjustments, and physical therapy to create individualized treatment plans that promote complete recovery without surgery or medication.

Beyond immediate pain relief, the clinic assists patients with insurance documentation and provides referrals to personal injury attorneys when necessary. This comprehensive approach ensures that accident victims receive both the medical care they need and the administrative support required for insurance claims.

The expanded walk-in services complement the clinic's existing same-day appointment system, providing multiple pathways for patients to access top rated accident injury treatment services. The extended weekday hours and Saturday availability accommodate patients who cannot take time off work for standard appointments, recognizing that many accident victims need to maintain their regular schedules while recovering.

The clinic's treatment protocols include spinal decompression, customized exercise programs, and ongoing rehabilitation designed to address both immediate pain and long-term recovery goals. Each patient receives a thorough evaluation to identify all areas of injury, as auto accidents frequently cause multiple trauma points that require coordinated treatment.

"We've seen firsthand how delayed treatment can lead to chronic pain conditions that could have been prevented with immediate intervention," added Dr. Lewis. "Our expanded walk-in services eliminate the barriers that prevent patients from seeking timely care, whether those barriers are scheduling conflicts, uncertainty about injury severity, or simply not knowing where to turn after an accident."

Arrowhead Clinic has served the Decatur community for multiple years, maintaining a patient satisfaction rating of 4.9 stars based on over 1,800 reviews. The clinic accepts most major insurance providers and works directly with auto insurance companies to minimize out-of-pocket expenses for accident victims. With over 48 years of combined experience treating musculoskeletal injuries, the clinic's team of health professionals specializes in non-invasive treatments that help patients return to their normal activities as quickly as possible.
