Junk Bee Gone Expands Dumpster Rental Service Across Columbus and Minnesota Communities

December 12, 2025

December 12, 2025 -
Junk Bee Gone, a family-owned waste management company based in Circle Pines, has announced expanded service coverage for its roll-off dumpster rental operations throughout the Twin Cities metropolitan area and surrounding Minnesota communities. The company now provides comprehensive waste disposal solutions to residents and businesses across multiple counties, including specialized service for dumpster rental in columbus mn and surrounding areas.

The expansion addresses growing demand for reliable waste management services in both urban and suburban communities throughout Anoka, Ramsey, Hennepin, Washington, Dakota, Chisago, and Isanti counties. The company offers three container sizes - 10-yard, 20-yard, and 30-yard dumpsters - to accommodate projects ranging from residential cleanouts to large-scale construction and demolition work.

"As communities throughout the Twin Cities continue to grow, we recognized the need for dependable, eco-friendly waste disposal options that serve both established neighborhoods and expanding areas," said Toni Wendt, Administrative at Junk Bee Gone. "Our expanded service territory ensures that whether customers are renovating homes in Stillwater or managing construction projects in Minneapolis, they have

access to the right-sized container for their specific needs."

The service area now encompasses major metropolitan centers, including Minneapolis and St. Paul, as well as growing suburban communities such as Blaine, Anoka, Coon Rapids, Circle Pines, Fridley, Columbia Heights, Roseville, Brooklyn Park, and Stillwater. This strategic expansion positions the company to serve both densely populated urban areas and rapidly developing suburban regions.

Junk Bee Gone's fleet of roll-off containers accommodates various project scales. The 10-yard dumpsters suit small residential cleanouts and minor renovation projects, while 20-yard containers handle medium-sized construction work and larger home improvement initiatives. The 30-yard dumpsters serve major construction sites, commercial renovations, and extensive demolition projects.

Beyond standard dumpster rental services, the company specializes in demolition waste management and comprehensive junk removal solutions. Each service incorporates environmentally responsible disposal practices, ensuring materials are properly sorted and recycled whenever possible. This commitment to sustainability extends throughout their operations, from initial pickup to final disposal.

The expansion particularly benefits residents seeking dumpster rental near circle pines mn, as the company maintains its headquarters in the area at Apollo Street Northeast. This central location enables efficient routing and timely delivery throughout the service territory, typically providing same-day or next-day container placement for most requests.

Junk Bee Gone distinguishes itself through personalized service approaches that address specific customer requirements. The company's drivers are trained to navigate residential streets and tight spaces, ensuring proper dumpster placement while minimizing property impact. This expertise proves especially valuable in established neighborhoods with mature landscaping and limited driveway access.

Formerly operating as Super Bee Disposal, Junk Bee Gone has established itself as a trusted waste management partner throughout the Twin Cities region. The company maintains regular operating hours Monday through Friday, focusing on reliable service delivery and customer satisfaction. Their comprehensive approach includes not only container rental but also complete junk removal services for customers who prefer full-service waste disposal solutions.
