

Contrast Landscape Expands Fleet to Support Hardscape and Snow Operations

December 12, 2025

EAST BRIDGEWATER, MA - December 12, 2025 - PRESSADVANTAGE -

Contrast Landscape, a landscaping, hardscaping, and construction company located at 35 Industrial Dr, East Bridgewater, MA 02333, has added two trucks to its fleet to meet growing demand for hardscape construction and snow plowing services. The expansion positions the company to handle heavier material loads on masonry projects and to respond more efficiently to winter weather across its service area in southeastern Massachusetts.

Owner Henrique Almeida configured each vehicle for a specific role. The first truck is built to transport dense materials such as pavers, concrete, and natural stone used for patios, retaining walls, walkways, and other hardscape installations. The second is set up to pull equipment trailers and operate a plow for residential and commercial snow removal.

"Over the past season, we have taken on more projects involving patios, retaining walls, and other hardscape elements," Almeida said. "Those jobs require moving significant amounts of stone and concrete, and having a

truck designed for that work helps us stay on schedule and reduce wear on our other vehicles."

The investment comes as Massachusetts enters the winter season. Contrast Landscape provides snow plowing for driveways, parking lots, and walkways, and the dedicated plow truck allows crews to respond to storms without pulling equipment away from ongoing construction projects. During warmer months, the same vehicle will haul trailers carrying mowers, excavation equipment, and other landscaping machinery between job sites.

Almeida noted that separating the fleet by function gives the company greater flexibility in scheduling work. "When we had trucks doing double duty, a delay on one job could ripple into the next," he said. "Now we can run hardscape deliveries and equipment transport on parallel tracks, which makes scheduling more predictable for our customers."

Contrast Landscape offers a range of outdoor services, including landscape design and installation, lawn care, hardscape construction, masonry, and seasonal maintenance. By coordinating multiple trades under one contractor, the company simplifies project management for property owners who might otherwise hire separate crews for grading, stonework, plantings, and related tasks. This approach is particularly valuable for larger outdoor renovations that involve both softscape elements like plantings and lawn areas alongside hardscape features such as stone patios or block retaining walls.

The fleet expansion supports that integrated approach. Having vehicles matched to different load types allows crews to arrive at job sites with the materials and equipment needed for excavation, base preparation, paver installation, and final cleanup without delays caused by shared resources. For customers, this translates to more accurate project timelines and fewer interruptions during active work.

Almeida said the company will track how the additional capacity affects project timelines and customer response over the coming year. The trucks represent the latest step in building infrastructure to support continued growth in both construction and snow services throughout Plymouth County and the surrounding region.
