

## The Homestar Group Expands Local Damage Restoration Services

*December 16, 2025*

December 16, 2025 - PRESSADVANTAGE -

The Homestar Group has announced a significant expansion of its damage restoration service capabilities, strengthening its ability to support property owners throughout the Atlanta metropolitan area. This expansion enhances the company's responsiveness to water damage, fire damage, mold remediation, and storm-related property emergencies, ensuring that homeowners and businesses across the region have access to reliable, professional restoration services when they need them most.

Founded in 2010, The Homestar Group began operations as a dedicated restoration provider serving the Atlanta area. Over the past 15 years, the company has built a strong reputation for quality service, technical expertise, and customer care. Its long-standing presence in Georgia has allowed the team to develop a deep understanding of local weather conditions and the unique restoration challenges property owners face. From heavy summer storms to unpredictable winter weather, the company's expanded capabilities are designed to address the full spectrum of damage scenarios common in the region.

Jeremy York, Owner of The Homestar Group, emphasized that the expansion is a direct response to community needs. ?This expansion allows us to serve property owners more effectively during critical situations when professional restoration services make a significant difference in recovery outcomes,? York explained. His statement underscores the company?s commitment to being a trusted partner during emergencies, when timely intervention can prevent small issues from becoming large-scale disasters.

The enhanced service offerings now include comprehensive water damage restoration for both residential and commercial properties, fire and smoke damage recovery, mold testing and remediation, sewage cleanup, storm damage response, and complete reconstruction services. Each project is handled by technicians certified through the Institute of Inspection, Cleaning and Restoration Certification (IICRC), ensuring that all work adheres to the highest industry standards. This certification provides property owners with confidence that restoration procedures are performed safely, effectively, and in compliance with best practices.

Atlanta?s climate continues to present ongoing challenges for property owners. Heavy rainfall and flash flooding remain the most common causes of water damage, while strong winds, tropical weather systems, and occasional tornadoes add further risks. The Homestar Group?s expanded services enable the company to respond comprehensively to these weather-related incidents, offering both immediate emergency support and long-term reconstruction solutions.

The company?s staff of 30 professionals manage every stage of the restoration process, from emergency response and damage assessment to repair and reconstruction. With round-the-clock availability, The Homestar Group ensures that property owners can access assistance at any time, day or night. By integrating emergency response with reconstruction capabilities, the company provides a seamless experience, allowing clients to work with a single provider throughout the recovery journey.

Another key element of the expansion is the company?s continued coordination with insurance providers. The Homestar Group assists property owners with claims processing, helping them navigate documentation requirements while restoration work is underway. This approach streamlines what can often be a complex and stressful process, reducing administrative burdens and allowing clients to focus on recovery.

The expanded services extend across the Atlanta metropolitan area, reaching communities such as Marietta, Decatur, Stone Mountain, and municipalities in Rockdale County. With its operational base in Conyers, The Homestar Group is strategically positioned to deliver timely service across this broad geographic footprint.

Ultimately, the expansion reflects The Homestar Group?s dedication to meeting the evolving restoration needs of Atlanta-area property owners. By combining technical expertise, certified professionals, and a customer-focused approach, the company continues to build on its legacy of service. Property owners seeking restoration support can learn more by visiting The Homestar Group?s website or contacting its

Conyers office directly.
