

ZeroTaxTags Expands Whitefish Office and Launches Customer Portal as Demand Grows for Montana LLC Vehicle Registration Support

December 15, 2025

WHITEFISH, MT - December 15, 2025 -
A Montana registered agent business called ZeroTaxTags says it expanded into a larger office in Whitefish and brought on additional team members to handle a growing number of requests from customers across the country.

The company works with clients nationwide, forming Montana LLCs and handling vehicle registrations for non-residents. Many customers are switching over after getting frustrated with unclear communication and slow turnaround times at other companies. The expansion comes as more vehicle owners discover the benefits of Montana's vehicle registration structure and seek professional guidance to navigate the process correctly.

ZeroTaxTags also launched a customer portal that helps clients manage vehicle registrations, LLC records, and documents in one place. The portal tracks registered agent mail handling too, including what's been received and forwarded, with updates visible in the same system. Clients can access the portal 24/7 from any device, allowing them to check on their registration status, view important documents, and stay informed

throughout the entire process. More information is available at zerotaxtags.com/about-pr.

The company also published a video walkthrough that explains how Montana LLC vehicle registration works and why clients choose this approach. The video has been viewed over 143,000 times since launching five weeks ago and walks through the entire process, from LLC formation to receiving permanent plates. The educational content breaks down complex registration requirements into easy-to-understand steps, helping potential clients make informed decisions about their vehicle registration options.

The company reports that the combination of educational resources and hands-on support has helped reduce client confusion during the registration process. ZeroTaxTags says many clients appreciate having access to both self-service information through the video content and personalized assistance from the team when questions arise about their specific situation.

"We built the portal so customers can see what's happening without chasing us for updates," said Kacie R, a Titlework Expert with ZeroTaxTags. "When everything's in one place, people can actually stay organized instead of digging through emails. Our clients told us they wanted transparency and real-time information, and that's exactly what the portal delivers."

The company added nearly 600 square feet of floor space, space for 6-8 additional workstations in its Whitefish office to handle the increased volume without cutting corners on service. The new office layout includes dedicated workstations for registration processing, title work coordination, and client support. ZeroTaxTags said the expansion also helps bring more jobs to Montana while supporting customers in all 50 states.

The team at ZeroTaxTags says the growth reflects a broader trend of vehicle owners seeking more professional support when establishing Montana LLCs for vehicle registration purposes. The company emphasizes that proper formation and maintenance of Montana business entities requires expertise in both registered agent services and vehicle registration coordination.

ZeroTaxTags specializes in helping clients navigate the complete workflow, from initial LLC formation with the Montana Secretary of State through final vehicle registration and ongoing compliance requirements. The company's registered agent services include professional mail handling, document management, and ensuring clients meet all Montana business requirements.
