Active Chiropractic Announces 4.9-Star Rating from Over 700 Google Reviews

December 15, 2025

RALEIGH, NC - December 15, 2025 -
Active Chiropractic has earned a 4.9-star rating based on more than 700 patient reviews posted on Google, reflecting sustained patient satisfaction with the practice?s range of non-invasive health services in Raleigh, North Carolina. The rating, calculated from independent third-party feedback, highlights experiences with chiropractic adjustments, Softwave Therapy, Dry Needling, Massage Therapy, Neuropathy Treatments, Acupuncture, and Lifestyle Education programs offered at the clinic.

Patients have submitted reviews detailing outcomes from treatments designed to address spinal alignment, nerve function, muscle tension, and chronic pain conditions. Chiropractic adjustments at the practice focus on restoring proper joint motion and reducing interference in the nervous system. Softwave Therapy delivers acoustic waves to targeted tissues to stimulate natural healing processes and improve circulation. Dry Needling is applied to deactivate trigger points within muscles that contribute to pain and restricted movement. Massage Therapy sessions incorporate deep tissue, Swedish, and other techniques to support recovery and relaxation. The Neuropathy Treatment program combines multiple modalities to manage symptoms associated with peripheral nerve damage. Acupuncture services and personalized Lifestyle Education further complement these offerings by addressing systemic balance and long-term health

strategies.

As a chiropractor in Raleigh, NC, Active Chiropractic serves residents throughout the greater Raleigh area with care for conditions that include neck pain, lower back pain, headaches, migraines, sciatica, carpal tunnel syndrome, sports injuries, and post-accident recovery needs. Treatment plans are developed after thorough evaluations of each patient?s health history, current symptoms, and personal goals. The clinical team, which includes licensed chiropractors, certified massage therapists, and acupuncturists, collaborates to deliver coordinated care.

Google reviews provide verifiable third-party documentation of patient experiences. Multiple entries describe noticeable reductions in pain levels following a series of chiropractic adjustments or Softwave Therapy sessions. Others report improved range of motion and decreased reliance on medication after completing the Neuropathy Treatment protocol. Patients frequently reference the integration of massage and acupuncture as factors that enhanced overall results. Several reviews highlight long-term relationships with the practice, with some individuals noting consistent care over periods exceeding ten years.

Dr. Molly Hall, chiropractor at Active Chiropractic, stated, ?Reviews from patients offer valuable insight that helps the team refine techniques and ensure treatments remain aligned with individual health objectives.?

Dr. Hall added, ?The volume and consistency of feedback on Google reinforce the role of evidence-based, non-invasive care in supporting patient outcomes.?

The rating arrives amid increasing public interest in drug-free approaches to pain management and wellness maintenance. National data from sources such as the American Chiropractic Association indicate that millions of adults seek chiropractic services annually for musculoskeletal concerns. Active Chiropractic contributes to this trend by maintaining an evidence-informed practice that incorporates patient-reported results into ongoing operations.

Reviews also mention specific cases where combined therapies addressed complex conditions. Examples include relief from chemotherapy-related nerve discomfort through Softwave Therapy and acupuncture, management of disc-related symptoms with spinal decompression and rehabilitation exercises, and resolution of chronic tension headaches following targeted adjustments and dry needling. Patients consistently note that educational guidance on posture, workplace ergonomics, and home exercise routines has helped sustain improvements achieved in the clinic.

The practice continues to monitor patient feedback through the Google platform and uses it to guide staff training and service updates. This approach ensures that care remains responsive to community needs while adhering to established clinical standards.

Active Chiropractic operates as a multi-disciplinary health center in Raleigh, North Carolina, specializing in chiropractic care and complementary therapies. The clinic provides chiropractic adjustments, Softwave Tissue Regeneration Technology, Dry Needling, therapeutic massage, neuropathy management programs, acupuncture, and lifestyle counseling aimed at restoring function and promoting long-term wellness for patients of all ages.
