

EcoClean Restoration Joins Greater Baltimore Chamber of Commerce

December 19, 2025

TIMONIUM, MD - December 19, 2025 -
EcoClean Restoration, a family-owned damage restoration company serving the Greater Baltimore area, has become the newest member of the Greater Baltimore Chamber of Commerce, strengthening its commitment to serving local businesses and residents throughout the region.

The IICRC-certified restoration company brings over six years of combined experience in emergency response and property restoration to the Chamber's growing network of businesses. The membership announcement, welcomed by the Chamber on December 1st, marks a significant milestone for the company as it continues expanding its presence throughout Baltimore and surrounding communities including Timonium, Columbia, Towson, Perry Hall, and Owings Mills.

"Joining the Greater Baltimore Chamber of Commerce represents an important step in our mission to serve this community with the highest standards of restoration services," said Cali Wilson, spokesperson for EcoClean Restoration. "This membership allows us to connect more deeply with local businesses and

property owners who need reliable, professional restoration services when disasters strike. Our 24/7 emergency response team understands that property damage doesn't wait for business hours, and neither do we."

The Chamber's recognition comes as property restoration needs continue to grow throughout Maryland, particularly for water damage restoration services. Recent weather patterns and aging infrastructure have increased demand for rapid response teams capable of handling everything from burst pipes to storm-related flooding. The company's average 45-minute response time and round-the-clock availability position it as a critical resource for both residential and commercial properties facing emergency situations.

EcoClean Restoration specializes in comprehensive damage restoration services including water extraction, fire and smoke damage cleanup, mold remediation, and complete reconstruction services. The company utilizes advanced technology such as thermal imaging cameras to detect hidden moisture and industrial-grade dehumidifiers to prevent secondary damage. Their team also provides direct insurance billing using Xactimate pricing software, streamlining the claims process for property owners during stressful recovery periods.

The importance of immediate professional response to property damage cannot be overstated. Untreated water damage can lead to dangerous mold growth and structural deterioration within 24 to 48 hours, making rapid intervention essential for minimizing both damage and restoration costs. The company's MHIC licensing and IICRC certification ensure that all restoration work meets industry standards for safety and quality.

Beyond emergency response, the company assists property owners through the entire restoration process, from initial assessment to complete reconstruction when necessary. Their services extend to handling contaminated water cleanup, antimicrobial treatments, and coordination with all major insurance carriers to reduce out-of-pocket expenses for clients.

EcoClean Restoration operates as a full-service restoration company providing water damage cleanup, fire damage restoration, mold testing and remediation, storm damage response, and reconstruction services throughout the Greater Baltimore metropolitan area. The family-owned business maintains IICRC certification and MHIC licensing while offering 24/7 emergency response services with a satisfaction guarantee.
