

Oceanville Company Launches Redesigned Medical Coding CEU Credits Courses Store

March 21, 2016

March 21, 2016 -

Certification Coaching Organization, LLC has announced the complete redesign and update of their Medical Coding CEU Credits store. The company, which is based in Oceanville, New Jersey, sells Medical Coding CEU Credits courses in a digital, online format so medical coders can maintain their AAPC certified credentials which are essential to their employment and careers.

Laureen Jandroep, CPC, CPC-I, COC, CMSCS, CHCI, CPPM, CCO founder and CEO, states, "We've spent the last several weeks streamlining the presentation of our popular Medical Coding CEU Credits store so the CEU courses are easier to navigate and compare."

Jandroep says that the company wanted to provide medical coding tools in an easier to access format for those who are seeking certification or who want to maintain their current status. This includes a complete overhaul of their previous system, and they have updated their website and store to be more mobile friendly. This is because so many students today rely on mobile phones for a number of tasks.

"The storefront also looks great on mobile devices for medical coders on the go," Jandroep says. "We felt this

was very important in today's busy world."

The company states that because certification is essential and maintaining certain credits and courses are required for many positions, they offer a wide range of courses to help those working in the medical coding and billing field, to make it easier for them to gain the criteria needed to satisfy job requirements.

Certification Coaching Organization, LLC provides articles, practice questions, and videos, many of which are offered free of charge, throughout their website. Paid products, such as their coding certification review and others, are also provided, all of which have been updated with the new redesign. Also on the site is a discussion board, which was recently implemented, to provide a place for coders to ask questions or answer queries from others in their industry.

Those interested in learning more can visit the Medical Coding Facebook page, or visit the company on their official website, where a complete list of their free and paid products, as well as articles and other information can be found.
