

# daylight AG Enhances Course Management Software Platform for Swiss Educational Institutions

*December 23, 2025*

Winterthur, ZH - December 23, 2025 -
daylight AG, a Winterthur-based educational technology company, has announced significant enhancements to its integrated software platform designed to streamline administrative operations for schools and educational organizations across Switzerland. The comprehensive system combines school administration, course management, examination processing, event coordination, and accounting functions into a single, modular solution.

The enhanced platform addresses growing demands from educational institutions seeking to modernize their administrative processes while maintaining focus on student success and learning outcomes. By consolidating multiple administrative functions into one unified system, schools can reduce operational complexity and improve data management efficiency. Additional information about daylight AG and its software solutions can be found at https://daylight-ag.localo.site/.

The software suite offers comprehensive functionality including people and address management,

registration processing, resource allocation, and financial accounting. Educational providers can also create customized online portals for course registration, enabling automated confirmation and payment processing. The platform's modular architecture allows institutions to select specific components based on their unique requirements.

Swiss educational institutions have increasingly adopted digital transformation strategies to meet evolving administrative demands. The daylight AG platform supports this transition by providing scalable solutions that integrate seamlessly with existing IT infrastructure. Organizations can choose between on-premise installation or cloud-based deployment, ensuring flexibility in implementation approaches.

The platform's examination management capabilities enable institutions to efficiently coordinate testing processes, from scheduling through results processing. Event management features support the organization of seminars, workshops, and educational conferences, while integrated marketing and CRM tools help institutions maintain effective communication with students and stakeholders.

Financial management represents a critical component of the platform, with accounting features designed specifically for educational environments. The system integrates with leading financial applications, ensuring compatibility with established accounting workflows while providing specialized functionality for education-sector requirements.

The company maintains its commitment to supporting Swiss educational institutions through continuous platform development and enhancement. By combining intelligent automation with intuitive interfaces, daylight AG enables educational providers to optimize administrative efficiency while maintaining high standards of service delivery.
