

Orthodontists Suggest Retainer Cleaner Kits as The Best Ways To Care For Specific Types of Orthodontic Retainers

March 18, 2016

March 18, 2016 -

Sanford, FL - FreySmiles Orthodontics was founded by two orthodontists Drs. Gregg and Scott Frey. According to their website they invest in the latest orthodontic technology and techniques so that they can deliver gorgeous smiles to patients. Their website contains some useful information for patients on the use and care of oral appliances.

Recently the website FreySmiles.com highlighted some important information in an article entitled ?The Best Way To Care For and Clean Orthodontic Retainers.? The article went through the ways to take care of retainers based off the type. They expounded on Traditional Hawley Type retainers, Hawley Metal Acrylic Retainers with Solder Joints, Clear Plastic Retainers, mouth guards and nightguards.

According to the website the traditional persulfate cleanser or non-persulfate cleanser can work with the different types of retainers except the Hawley Metal Acrylic Retainers with Solder Joints. In this case only the

non-persulfate cleansers should be used. This is because the ?persulfate based cleansers are notorious for corroding solder joints on orthodontic retainers. To avoid corroding your retainer with daily cleaning it is best to use a non-persulfate retainer cleanser.?

FreySmiles.com noted that no matter the type of retainer, the owner should always remember to clean it once a day. Additionally they advised not to over soak the metal and acrylic retainers, especially those with soldered joints because it may cause corrosion of the metal.

?We had a chance to look over the information from FreySmiles.com and note that our retainer cleaner is capable of cleaning all of the different types of retainers. Our cleaning kit also works well with false teeth, invisalign, dentures, dental guards and other kinds of oral appliances,? commented a representative from Monikas Marketplace makers of the Retainer Cleaner Kit.

The Retainer Cleaner Kit from Monikas Marketplace contains a denture bath with a drain and is big enough to hold both top and bottom dental appliances. It is oval shaped and contains a 30-day supply cleaning solution.

The Retainer Denture Cleaner Kit from Monikas Marketplace is sold exclusively on the shopping portal, Amazon. Customers can save 15% each on qualifying items from Monikas Marketplace when they purchase three or more products. They can access this by entering the code O6Z5SGW9 at checkout.
