

## RestoreNow Expands Property Restoration Service Coverage

*January 09, 2026*

HANOVER, MA - January 09, 2026 - PRESSADVANTAGE -

RestoreNow, a family-owned restoration company serving South Shore, Massachusetts, has announced the expansion of its property repair and restoration services throughout the region. The company specializes in structural restoration and reconstruction following water, fire, and mold damage to both residential and commercial properties. With this expansion, RestoreNow aims to support a growing number of homeowners, landlords, and business owners seeking dependable, high-quality restoration services delivered with consistency and professionalism.

Founded approximately three years ago, RestoreNow operates as a certified women-owned business enterprise through the Women's Business Enterprise National Council (WBENC). Although the company itself is relatively young, its team brings more than 30 years of combined industry experience to every project. This depth of knowledge has shaped RestoreNow's reputation for thorough workmanship, clear communication, and a customer-first approach. The expansion enables the Hanover-based company to serve a broader area across the South Shore and Southeastern Massachusetts, including Quincy, Braintree, Plymouth, Weymouth, and other nearby communities that frequently experience weather-related and infrastructure-related property damage.

RestoreNow coordinates emergency response services through trusted licensed partners while handling the structural repairs and restoration work that follows. This operational model allows the company to manage projects from the initial damage assessment through the final reconstruction phase. By partnering with vetted mitigation specialists, RestoreNow ensures that emergency needs—such as water extraction, fire cleanup, and mold containment—are addressed quickly and professionally before the structural restoration begins. The company offers 24-hour emergency coordination, with typical response times of 30 to 60 minutes for urgent situations, helping property owners stabilize damage as quickly as possible.

The company's restoration services address a wide range of damage sources common to the region. Heavy rainfall, frozen pipes, basement flooding, sump pump failures, and seasonal hurricanes frequently impact homes and businesses across the South Shore. RestoreNow manages structural repairs following water extraction and drying, rebuilds after fire and smoke damage, and reconstruction work following storm cleanup. The company also assists clients with insurance claim documentation, providing detailed estimates, moisture readings, and damage assessments to support a smoother and more transparent claims process.

"Our focus has always been on quality restoration work and getting families and businesses back to normal as quickly as possible," said Alexandra Ryan, Owner of RestoreNow. "This expansion allows us to bring that commitment to more communities across the South Shore."

RestoreNow's operations emphasize rapid response, efficient project management, and thorough restoration. The company specializes in structural rebuilds, including repairs to ceilings, walls, flooring, framing, and other essential components affected by water, fire, or mold. By coordinating closely with licensed mitigation partners, RestoreNow ensures a seamless workflow from start to finish, reducing delays and improving overall outcomes for clients who need reliable support during stressful situations.

In addition to its restoration services, RestoreNow remains active in community initiatives. The company participates in quarterly charitable efforts supporting organizations such as the Boys & Girls Club and local animal shelters. Its certification as a women-owned business reflects its commitment to diversity, representation, and leadership within the construction and restoration industries.

The expansion of RestoreNow's service coverage comes at a time when many South Shore communities are experiencing increased property damage due to shifting weather patterns and aging infrastructure. By extending its reach while maintaining its focus on quality, responsiveness, and community involvement,

RestoreNow aims to meet the region's growing demand for professional restoration and reconstruction services that return properties to pre-damage condition.
