

Keathley Landscaping Expands Custom Stonework and Professional Sod Installation Services Across North Texas

January 16, 2026

GARLAND, TX - January 16, 2026 -
Keathley Landscaping, a Dallas-based landscaping company, has expanded its comprehensive outdoor transformation services throughout North Texas, addressing the growing demand for professional drainage solutions, custom stonework installations, and rapid sod installation projects. The expansion comes as homeowners increasingly seek integrated landscaping solutions that combine aesthetic enhancements with functional improvements to their outdoor spaces.

The company's expanded service portfolio encompasses natural and modern stonework installations, retaining walls, outdoor living spaces, and professional sod installation that can transform yards from bare dirt to lush green lawns within one to three days. As an NDS Certified Drainage Contractor, the company also specializes in solving complex yard drainage problems that plague many North Texas properties due to the region's clay soil composition and variable weather patterns.

"North Texas homeowners face unique challenges with their outdoor spaces, particularly when it comes to drainage issues that can cause expensive damage to their properties," said Logan Keathley, NDS Certified Drainage Contractor and founder of Keathley Landscaping. "Our integrated approach allows us to address these functional concerns while simultaneously creating beautiful outdoor environments through custom stonework and pristine sod installations."

The expansion of services in Parker and surrounding communities reflects the company's response to increased requests for sophisticated landscape enhancements over the past year. The company's stonework offerings range from timeless flagstone installations to sleek modern paver designs, while also including practical structures such as retaining walls, outdoor kitchens, fireplaces, and decorative flowerbed borders.

Drainage problems remain a critical concern for North Texas homeowners, particularly during the region's intense storm seasons. Poor drainage can result in flooding, foundation damage, and landscape erosion that insurance policies often do not cover. The company's drainage solutions include French drain installations, comprehensive grading projects, and custom-designed buried drainage pipe systems tailored to each property's specific needs.

"Every property presents unique challenges, whether it's standing water issues, erosion problems, or the need for complete landscape transformation," added Keathley. "Our team combines technical expertise with practical solutions to ensure homeowners get lasting results without excessive costs."

The company's sod installation services provide rapid lawn establishment for both new construction and landscape renovation projects. Professional installation ensures proper soil preparation, precise grading, and optimal growing conditions that contribute to long-term lawn health and property value enhancement.

Keathley Landscaping has been serving the Dallas metropolitan area since 2002, providing comprehensive landscaping solutions that include landscape design and construction, fence repair and installation, patio covers, tree trimming and removal, and ongoing lawn maintenance services. The company's commitment to quality workmanship and customer satisfaction has established its reputation throughout North Texas communities, including Dallas, Garland, Wylie, Plano, Allen, Richardson, Frisco, Rockwall, and surrounding areas.

The expanded services are now available throughout the North Texas region, with the company offering consultations to assess individual property needs and develop customized solutions for drainage, stonework, and sod installation projects.
