

Unlimited Comfort Mattress Factory Announces Expanded Custom Manufacturing Services for Marine and RV Markets

December 29, 2025

SARASOTA, FL - December 29, 2025 -
Unlimited Comfort Mattress Factory, a Sarasota-based mattress manufacturer, announced today the expansion of its custom manufacturing capabilities to address growing demand from recreational vehicle and marine vessel owners throughout Southwest Florida.

The company has developed specialized production processes to create mattresses meeting the unique dimensional and structural requirements of RVs and boats, addressing a market segment often underserved by standard bedding manufacturers. The expansion includes new cutting equipment and pattern development specifically for non-standard mattress sizes.

"The RV and marine markets present distinct challenges that require precision manufacturing and material expertise," said the Director of Manufacturing at Unlimited Comfort Mattress Factory. "Standard residential mattresses rarely fit properly in these applications, and our expanded capabilities allow us to produce exact

specifications for any vessel or vehicle configuration."

Unlimited Comfort Mattress Factory's location at 4051 Clark Road serves as both the manufacturing facility and showroom where customers can review material options and discuss custom specifications. The facility produces five primary mattress models utilizing various support systems, including pocketed coil configurations and memory foam technologies.

The Cloud 11th model incorporates the American Comfort2000 Pocketed Coil System with 2.5-inch mini comfort micro coils. The Diamond model features Energex and pulse latex foam with medium-firm support characteristics. The Infinity model utilizes memory foam with three-zoned support architecture. The Paradise model combines the American Comfort800 Pocketed Coil System with Energex foam for softer surface preferences. The SRQ model provides extra-firm support through pulse latex foam and three-zoned pocketed coil construction.

According to industry data from the Recreational Vehicle Industry Association, RV shipments to dealers reached 493,000 units in 2023, with Florida ranking among the top five states for RV registrations. The National Marine Manufacturers Association reports similar growth in boat sales, particularly in coastal regions.

The company's delivery network extends throughout Southwest Florida, including regular service to Bradenton, Lakewood Ranch, Venice, and the North Port area. Custom orders typically require two to three weeks for production and delivery, depending on specifications and materials selected.

The manufacturer provides a 15-year warranty on all products and offers a lifetime comfort adjustment program allowing customers to modify firmness levels after purchase. This service addresses the variability in comfort preferences that can occur with changes in health conditions or sleeping patterns.

The expansion into specialized markets coincides with broader industry trends toward customization and niche manufacturing. The Sleep Products Safety Council notes that custom mattress production has increased 18 percent nationally over the past three years as consumers seek products tailored to specific needs.

Unlimited Comfort Mattress Factory operates as a regional manufacturer specializing in handcrafted mattresses. The company maintains production facilities in Sarasota where each unit is individually constructed using various coil systems and foam materials. The operation serves residential customers throughout Southwest Florida while developing specialized capabilities for recreational vehicle and marine

applications.
