

Go Industries Inc Expands Truck Grille Guards Line with Advanced Winch Integration Systems

January 14, 2026

Richardson, TX - January 14, 2026 -
Go Industries Inc, a Texas-based manufacturer of heavy-duty truck accessories, has expanded its commercial-grade winch grille guard offerings to meet growing demand from fleet operators and commercial truck owners across North America. The expansion introduces enhanced modular design features that provide increased flexibility for various commercial and off-road applications.

The expanded product line features modular-style grille guards that serve as a foundation for adding winch carriers and brush guards, addressing the diverse needs of commercial fleet operators, construction companies, and off-road enthusiasts. The system accommodates both 9.5 and 16.5 winch carriers, providing versatility for different winching requirements across various vehicle applications.

"The expansion of our winch grille guard systems reflects our commitment to meeting the evolving needs of commercial truck operators who require reliable, heavy-duty protection for their vehicles," said a Go Industries spokesperson. "Our modular approach allows customers to start with a base system and add

components as their requirements grow, making it a practical investment for long-term vehicle protection."

The winch grille guard system is constructed from 5/16-inch laser-cut steel uprights paired with 2.5-inch 16-gauge steel cross tubes, offering robust protection against road debris and obstacles encountered in commercial operations. The design incorporates custom, heavy-duty mounting brackets engineered for maximum strength and simplified installation, reducing downtime for fleet operators.

A key feature of the expanded commercial line is the optional brush guard addition, which complements vehicle lines while creating additional protection for the headlight area from road debris and off-road brush. This modular capability enables operators to tailor their protection systems to specific operational requirements and environmental conditions.

The products are available for a wide range of truck makes and models, with customization options including color selection and component configuration. Each system is backed by a three-year warranty covering materials, workmanship, and finish, providing assurance for commercial operators who depend on their vehicles for daily operations.

Go Industries Inc has been manufacturing heavy-duty truck accessories in the United States since 1978. The company specializes in front and back-end protection systems, including grille guards, bumper replacements, headache racks, and specialized equipment for law enforcement vehicles. All products are manufactured at the company's Texas facilities, where strict quality control standards are maintained throughout the production process. The company holds Platinum Status with SEMA, recognizing its commitment to product quality and service excellence in the automotive aftermarket industry.

Detailed product specifications and configuration options are available at https://www.goindustries.com/product/winch-grille-guards-system/, where customers can select components based on their specific vehicle year, make, and model.
