Blackhawk Plastic Surgery & MedSpa Marks Over Two Decades of Surgical Excellence in Danville

January 06, 2026

Danville, CA - January 06, 2026 -
Blackhawk Plastic Surgery & MedSpa in Danville, California, continues to serve the local community with comprehensive aesthetic and reconstructive procedures, marking nearly 25 years of established practice since its founding in 2001. The practice, located in the Blackhawk area, has maintained its commitment to providing consistent medical standards and building long-term patient relationships throughout its tenure in the region.

"Establishing deep roots in the Danville community has allowed us to develop meaningful, long-term relationships with our patients and witness the positive impact of our work across generations of families," said Dr. Stephen J. Ronan, FACS, founder and board-certified plastic surgeon at the practice. "Our nearly 25-year presence in the Blackhawk area represents more than just longevity; it demonstrates our unwavering commitment to maintaining the highest surgical standards while adapting to evolving aesthetic medicine techniques that benefit our local patients."

Founded by Dr. Stephen J. Ronan, FACS, the practice has become a cornerstone of aesthetic medicine in the East Bay Area, serving patients from Danville and surrounding communities including Walnut Creek, San Ramon, Alamo, Dublin, Pleasanton, and Livermore. The longevity of the practice reflects both the sustained trust of local patients and the continuity of care that has defined its approach to cosmetic and reconstructive surgery.

The practice offers an extensive range of surgical and non-surgical procedures, including facial rejuvenation, breast enhancement and reconstruction, body contouring, and advanced MedSpa treatments. This comprehensive approach allows patients to receive continuity of care for various aesthetic concerns under one established practice. The facility combines traditional surgical expertise with modern technologies such as CoolSculpting, ellacor skin tightening, and Aviclear treatments.

For residents of California seeking established aesthetic care, the practice's long-standing presence provides reassurance in an industry where new providers frequently enter and exit the market. The stability offered by a practice with deep local roots enables patients to maintain consistent relationships with their medical team, ensuring a comprehensive understanding of their aesthetic goals and medical history over time.

The Danville plastic surgeon and his team have witnessed significant advances in aesthetic medicine throughout their tenure, incorporating evidence-based techniques while maintaining the personalized approach that has characterized the practice since its inception. This balance between innovation and consistency has enabled the practice to serve multiple generations of patients from the same families, reflecting the trust built within the community.

Blackhawk Plastic Surgery & MedSpa operates from its Danville location, offering both surgical procedures and non-invasive treatments. The practice provides virtual consultations and has developed programs to accommodate patients from outside the immediate area, though its primary focus remains serving the local Danville and Blackhawk communities. The facility houses state-of-the-art surgical suites and treatment rooms, supporting the full spectrum of aesthetic procedures from minor non-invasive treatments to complex reconstructive surgeries.
