

Full Spectrum Technology Group Featured on Bay Area AV Pros

December 31, 2025

Concord, California - December 31, 2025 -
Full Spectrum Technology Group announced today it has been selected as one of 12 top audiovisual installation companies featured on BayAreaAVPros.com, a newly launched directory connecting Bay Area homeowners with verified AV professionals. The Concord-based smart home integration company was recognized for its expertise in home automation, theater design, and custom audio-video solutions serving 21 communities across the San Francisco Bay Area.

The directory was created to help homeowners navigate the complex process of selecting qualified AV installation professionals for projects ranging from whole-house automation to dedicated home theaters. Companies featured on the platform were evaluated based on verifiable experience, manufacturer technical certifications, documented customer satisfaction ratings, and demonstrated expertise across multiple technology categories. The selection process included review of completed installations, client references, and ongoing professional development credentials.

Full Spectrum Technology Group earned its placement through more than a decade of service to Bay Area residential clients, with particular recognition for its comprehensive approach to integrated home technology. The company specializes in designing systems where lighting control, motorized shades, security, networking, and entertainment systems operate as a unified, intelligent environment rather than disconnected components.

"Being selected for this directory validates our commitment to technical excellence and client service," said Sean Mendell, owner of Full Spectrum Technology Group. "Every project we complete is built on the principle that technology should enhance daily life without adding complexity. Our goal is creating homes that respond intuitively to how people actually live."

The company offers a complete range of residential technology services including home automation design and installation, custom home theater configuration, whole-house audio distribution, outdoor entertainment systems, advanced networking infrastructure, surveillance and security integration, automated lighting and shade control, and ongoing technical support. Full Spectrum serves communities including Alamo, Atherton, Danville, Lafayette, Los Altos, Napa, Saratoga, Walnut Creek, and Woodside, among others throughout the Bay Area.

Industry analysts note that the residential AV integration market has experienced significant growth as homeowners increasingly expect seamless technology experiences similar to commercial environments. The challenge for consumers lies in identifying installation companies capable of designing sophisticated systems while maintaining reliable long-term support. This difficulty has created demand for curated professional directories that verify credentials and track performance history, helping homeowners make informed decisions based on documented expertise rather than marketing claims alone.

Full Spectrum differentiates itself through what the company describes as precision installation combined with personalized design consultation. Each project begins with detailed assessment of how clients use their spaces, followed by custom system design that addresses specific lifestyle needs rather than applying template solutions. The company maintains availability Monday through Friday from 8:00 AM to 8:00 PM and weekends from 10:00 AM to 6:00 PM to accommodate client schedules.

"Technology integration is about understanding people as much as understanding equipment," Mendell added. "The systems we install need to work flawlessly for years, which requires both technical expertise during installation and genuine partnership with clients throughout the ownership experience."

Full Spectrum Technology Group has served Bay Area homeowners since 2012, building a reputation for

integrated smart home solutions across the East Bay, Peninsula, and Napa County regions. The company operates from its Concord facility at 970 Detroit Avenue, Suite F, and maintains technical support capabilities for residential clients throughout its service area. For more information, homeowners can contact Full Spectrum at (925) 815-8324 or admin@fullspectrumtg.com.
