

Keathley Landscaping Expands Yard Drainage Solutions to Address North Texas Water Management Challenges

January 22, 2026

GARLAND, TX - January 22, 2026 -
Keathley Landscaping has expanded its specialized drainage services to meet growing demand for professional water management solutions across North Texas residential properties. The expansion addresses complex drainage challenges that increasingly threaten homes throughout the Dallas metropolitan area, particularly as seasonal rainfall patterns and clay soil conditions create persistent water management issues.

The expansion comes as homeowners across Dallas, Garland, Wylie, Plano, and Rockwall report increasing concerns about foundation damage and landscape deterioration due to inadequate drainage systems. Water damage from poor drainage typically falls outside standard homeowner insurance coverage, making preventive solutions essential for property protection.

"Property owners throughout North Texas face significant water management challenges that require

specialized expertise and proven solutions," said Logan Keathley, owner and NDS Certified Drainage Contractor at Keathley Landscaping. "Our expanded drainage services address everything from simple grading issues to complex water management problems that threaten foundation integrity and landscape investments. Each property presents unique challenges, and our certification through National Diversified Sales ensures we implement solutions that meet industry best practices."

The expanded service portfolio includes comprehensive drainage system design and installation, with particular emphasis on French drains, advanced grading solutions, channel drain systems, and custom-designed buried drainage pipes. These solutions specifically target the unique challenges facing North Texas properties, where clay soil prevents proper water absorption and irregular topography often directs water toward foundations rather than away from structures.

The company's drainage solutions incorporate advanced technologies and methodologies gained through NDS certification, a designation that demonstrates expertise in professional drainage system design and installation. This certification provides access to cutting-edge drainage products and ensures adherence to industry standards for water management solutions.

Beyond drainage services, the company maintains its comprehensive landscape construction offerings, including natural and modern stonework, retaining walls, outdoor living spaces, and professional sod installation. The integration of drainage expertise with traditional landscaping services enables comprehensive property solutions that address both aesthetic and functional requirements.

"Effective drainage forms the foundation of any successful landscape project," added Keathley. "Without proper water management, even the most beautiful landscape installations face premature deterioration. Our approach integrates drainage considerations into every project phase, ensuring long-term property protection and landscape sustainability."

Keathley Landscaping has served the Dallas metropolitan area since 2002, providing landscape design, construction, and maintenance services to residential and commercial properties. The company specializes in custom stonework, cedar fence installation, and comprehensive outdoor living space development, alongside its expanded drainage solutions portfolio. Through its combination of technical expertise, industry certification, and regional experience, the company addresses the full spectrum of landscape and water management needs for North Texas properties.
