

Keathley Landscaping Expands Yard Drainage Solutions and Stonework Services Across Wylie

January 26, 2026

GARLAND, TX - January 26, 2026 - PRESSADVANTAGE -

Keathley Landscaping, a certified NDS drainage contractor serving the Dallas metropolitan area, announces expanded capabilities in residential drainage systems and custom stonework installations to address increasing demand from North Texas and Wylie homeowners facing water management challenges and seeking enhanced outdoor living spaces.

The expansion comes as homeowners throughout the region continue to struggle with drainage issues caused by North Texas clay soil, which can lead to foundation damage, flooding, and landscape deterioration. The company's enhanced services combine advanced drainage technology with aesthetic stonework solutions to create functional and visually appealing outdoor environments.

"North Texas homeowners face unique challenges when it comes to yard drainage, particularly with our heavy clay soil that prevents proper water absorption," said Logan Keathley, NDS Certified Drainage Contractor and owner of Keathley Landscaping. "Our expanded services allow us to provide comprehensive

solutions that not only solve drainage problems but also enhance the overall beauty and functionality of outdoor spaces through custom stonework and hardscape installations."

The company's drainage solutions include French drain systems, comprehensive grading services, and custom-designed buried drainage pipes specifically engineered for local soil conditions. These systems work in conjunction with stonework installations such as retaining walls, which provide both structural support for sloped properties and aesthetic enhancement to landscapes.

Keathley Landscaping Wylie operations have seen particular growth in requests for integrated drainage and hardscape projects, where homeowners seek to address water management issues while simultaneously upgrading their outdoor living spaces. The company's stonework services encompass natural flagstone installations, modern paver designs, retaining walls with decorative veneers, and flowerbed borders that define garden spaces while facilitating proper water flow.

The expanded service offerings include outdoor kitchens, fireplaces, and fire pits designed to transform backyards into functional entertainment spaces. These features integrate with drainage solutions to ensure proper water diversion away from structures and gathering areas.

"Property owners often don't realize that poor drainage can cause expensive damage that insurance typically doesn't cover," added Keathley. "By combining our drainage expertise with quality stonework and landscaping services, we're able to protect homes while creating outdoor spaces that add significant value to properties."

Beyond drainage and hardscaping, the company maintains its established sod installation services, often completing sod wylie projects within one to three days. These installations frequently accompany drainage improvements, as proper water management proves essential for maintaining healthy lawns in the challenging North Texas climate.

The company's certification as an NDS drainage contractor ensures adherence to industry best practices and access to professional-grade drainage products designed for long-term performance in North Texas conditions.

Keathley Landscaping has served the Dallas metropolitan area since 2002, specializing in comprehensive landscape design, installation, and maintenance services. The company provides residential landscaping solutions throughout Dallas, Garland, Wylie, Plano, and surrounding communities, with expertise in drainage systems, hardscape installations, fence construction, outdoor living spaces, and lawn care services.
