

Big Easy AC Heating Adds Eleventh Community to Service Territory

January 20, 2026

NEW ORLEANS, LA - January 20, 2026 - PRESSADVANTAGE -

Big Easy AC Heating has added St. Rose to its service territory, extending the New Orleans-based HVAC contractor's coverage to an eleventh community in southeastern Louisiana. The expansion brings air conditioning and heating services to residents and businesses in the St. Charles Parish community located on the Mississippi River's east bank.

St. Rose is a census-designated place situated two miles north of the Jefferson Parish line and is part of the Greater New Orleans metropolitan area. The community's population grew from 6,540 in 2000 to 7,504 in 2020, according to census data. The addition of St. Rose connects Big Easy AC Heating's service territory to nearby communities including Kenner and River Ridge.

Big Easy AC Heating now serves 11 communities across southeastern Louisiana. The company's service areas include Baton Rouge, Covington, Gretna, Hammond, Kenner, LaPlace, Madisonville, Mandeville, Metairie, Slidell, and St. Rose. The company operates from its New Orleans headquarters, providing both residential and commercial HVAC services throughout this regional footprint.

The company's residential services include air conditioning, air duct cleaning, air ducts installation, ductless systems, furnaces, heat pump systems, indoor air quality services, maintenance, and zone control systems. Big Easy AC Heating also provides commercial services including heating, ventilation, refrigeration, sheet metal ductwork, and cooling for business properties.

HVAC contractors perform three primary categories of work: maintenance, repairs, and installation. Maintenance services at Big Easy AC Heating include checking for leaks in pipes and tube joints, testing thermostats, checking and topping off refrigerant levels, testing electrical circuits, inspecting fans and motors, cleaning air ducts, troubleshooting components, and replacing HVAC air filters.

Repair work follows maintenance when issues are identified. This phase involves installing, repairing, or replacing defective parts to restore heating or cooling system operation. Repairs are frequently urgent during extreme weather conditions, particularly during cold winters or hot summers when system failures create immediate comfort concerns for property occupants.

Installation services encompass surveying and inspecting existing systems, taking measurements to ensure proper sizing and capacity for the property, de-installing existing systems while minimizing disruption to occupants, connecting new units including ductwork, wiring, tubing, pipes, or electrical supply lines, and conducting final checks after installation is complete.

Big Easy AC Heating addresses indoor air quality concerns related to dirty air ducts and cooling systems. Dust and debris buildup in air ducts can accumulate over time and affect indoor air quality. The company provides cleaning services using equipment designed to remove contaminants from duct systems. Regular cleaning can help extend the operational life of air duct systems.

The St. Rose expansion positions Big Easy AC Heating to serve a community with geographic proximity to its existing service areas. St. Rose's location in St. Charles Parish places it along the Mississippi River corridor, where the company already maintains service coverage through its LaPlace operations.

Big Easy AC Heating operates Monday through Friday from 8:00 AM to 6:00 PM, with Saturday and Sunday closed. The company can be contacted at 504-608-4636 from its New Orleans location. The St. Rose service area addition reflects the company's continued coverage expansion across the Greater New Orleans metropolitan region and surrounding parishes.

The town of St. Rose derived its name from St. Rose Plantation, located near the present-day intersection of River Road and Louisiana Highway 626. The plantation, named for the patron saint of the Americas, survived

until 1904. The community's growth over recent decades has increased demand for residential and commercial services including HVAC contractors serving the area.
