

Clear Quality Auto Glass Expands Windshield Replacement Services as Road Hazards Increase Driver Safety Concerns

January 21, 2026

Las Vegas, NV - January 21, 2026 -
Clear Quality Auto Glass, a Las Vegas-based auto glass specialist with over 15 years of experience, has expanded its professional windshield replacement services to address increasing driver safety concerns caused by road hazards and severe weather conditions affecting the region.

The expansion comes as automotive safety experts report rising incidents of windshield damage from construction debris, gravel roads, and extreme temperature fluctuations that create stress cracks in vehicle glass. The company has enhanced its service capacity across three Las Vegas locations and mobile units to meet growing demand for immediate windshield replacement and repair services.

"Road conditions throughout Nevada have become increasingly challenging for drivers, with construction zones and weather-related hazards contributing to a significant uptick in windshield damage," said Pete Hall, spokesperson for Clear Quality Auto Glass. "Our expanded services ensure drivers can quickly restore their

vehicle's structural integrity and safety features, particularly the Advanced Driver Assistance Systems that rely on properly calibrated windshields."

Clear Quality Auto Glass windshield replacement services now include comprehensive ADAS calibration, ensuring that cameras and sensors attached to windshields function correctly after replacement. This technical capability has become essential as modern vehicles increasingly rely on windshield-mounted technology for safety features such as lane departure warnings and automatic emergency braking.

The company operates from its main facility on South Decatur Boulevard and maintains mobile service units stationed at South Rainbow Boulevard and East Cactus Avenue. This strategic positioning allows technicians to respond rapidly to service requests throughout the Las Vegas metropolitan area, including on-site replacements at customer locations.

Beyond standard windshield replacement, the company offers specialized services, including windshield scratch repair, chip repair, and ceramic nano-coating applications. The ceramic coating technology offers extended protection against environmental damage, lasting up to three times longer than conventional protective coatings.

"Driver visibility and windshield integrity are fundamental to road safety, yet many motorists postpone necessary repairs due to convenience concerns," added Hall. "Our mobile replacement service eliminates this barrier by bringing professional installation directly to homes and workplaces, ensuring vehicles maintain optimal safety standards without disrupting daily schedules."

The expansion includes upgraded equipment for precise glass installation and enhanced training protocols for technicians specializing in various vehicle makes and models. The company also maintains relationships with major insurance providers, facilitating coverage for windshield chip repairs and replacements under comprehensive policies.

Clear Quality Auto Glass has served the Las Vegas community for more than 15 years, specializing in comprehensive auto glass services including windshield replacement, auto glass repair, window tinting, and mirror glass replacement. The company maintains a commitment to combining experienced craftsmanship with advanced glass technology to ensure vehicle safety and performance. Additional services include window regulator replacement and specialized treatments for commercial and residential vehicles.
