

RestoPros of North Boston Expands Emergency Restoration Services to Meet Growing Community Needs

January 22, 2026

NORTH BOSTON, MA - January 22, 2026 - PRESSADVANTAGE -

RestoPros of North Boston, a professional restoration company specializing in water, fire, mold, and storm damage restoration, has expanded its emergency response capabilities to better serve residential and commercial clients throughout North Boston and surrounding communities. The expansion addresses increased demand for rapid-response restoration services following recent severe weather patterns affecting the region.

The enhanced service expansion enables the restoration company to deploy additional certified technicians and advanced equipment for water damage, fire and smoke restoration, mold remediation, and storm damage recovery. With 30 years of combined industry experience, the company maintains round-the-clock emergency response teams ready to address property damage incidents at any hour.

The expansion comes as extreme weather events and aging infrastructure continue to challenge property owners across the region. Water damage from burst pipes, flooding, and storm-related incidents remains the most common emergency call, followed by fire and smoke damage restoration needs. The company's mold

remediation services have also seen increased demand, particularly following water damage events where moisture creates conditions for mold growth.

"Property damage from water, fire, or storms requires immediate professional attention to prevent further deterioration and potential health hazards," said Paul Burns, Owner of RestoPros of North Boston. "Our expanded capabilities allow us to respond faster and serve more families and businesses when disasters strike, reducing overall restoration time and helping people return to normal life more quickly."

RestoPros of North Boston follows Institute of Inspection, Cleaning and Restoration Certification (IICRC) guidelines for all restoration projects, ensuring industry-standard practices for water extraction, structural drying, smoke odor removal, and microbial remediation. The company's technicians undergo continuous training to stay current with evolving restoration technologies and methodologies.

The expanded services include comprehensive damage assessment, emergency board-up and tarping, water extraction and drying, smoke and soot removal, deodorization, mold testing and remediation, content cleaning and restoration, and complete structural repairs. Each project begins with a thorough inspection to develop a customized restoration plan tailored to the specific damage and property requirements.

Commercial clients benefit from priority response protocols designed to minimize business interruption, while residential customers receive compassionate support during stressful property damage situations. The company coordinates directly with insurance providers to streamline claims processing and documentation.

"We understand that property damage disrupts lives and livelihoods," added Burns. "Our expansion reinforces our commitment to being the trusted restoration partner our community can depend on during their most challenging moments."

RestoPros of North Boston serves as a comprehensive restoration service provider offering water damage restoration, fire and smoke damage restoration, mold remediation, and storm damage restoration throughout North Boston and neighboring communities. The company maintains 24/7 emergency response capabilities, provides free inspections with detailed quotes, and carries full insurance coverage for all restoration projects.
