Wastewater Supply Expands Product Portfolio with Alderon Industries Manufacturing Partnership

March 02, 2026

Noblesville, Indiana - March 02, 2026 -
Wastewater Supply, a leading distributor of wastewater treatment products and solutions, today announced an expanded partnership with Alderon Industries, strengthening its ability to provide comprehensive control and monitoring solutions for residential, commercial, municipal, industrial, and agricultural applications.

The partnership enables Wastewater Supply to offer Alderon's complete line of float switches, alarm panels, and control panels to its growing customer base throughout the Midwest region. With two decades of manufacturing expertise, Alderon Industries brings both standard and custom control solutions designed specifically for the demanding requirements of the water and wastewater industry.

"This expanded partnership represents a significant enhancement to our product portfolio," said Cameron Lynch, representing Wastewater Supply. "Alderon's reputation for engineering excellence and their ability to create both cost-effective standard solutions and complex custom systems aligns perfectly with our commitment to meeting diverse customer needs across all market segments."

The collaboration addresses the increasing demand for reliable wastewater management solutions across

multiple sectors. Alderon's product range spans from simple, economical float switches suitable for residential applications to sophisticated control panels designed for large-scale municipal and industrial facilities. This versatility allows Wastewater Supply to serve a broader spectrum of clients with varying technical requirements and budget considerations.

Wastewater Supply has built its reputation on providing expert guidance alongside quality products from leading manufacturers. The addition of Alderon's offerings complements the company's existing partnerships with manufacturers including AK Industries, Barmesa Pumps, Champion Pump, Franklin Electric, and Goulds Water Technology. This comprehensive manufacturer network ensures customers have access to complete wastewater treatment systems from a single source.

The partnership comes at a time when wastewater infrastructure modernization continues to be a priority across the United States. Municipalities and industrial facilities are increasingly seeking advanced monitoring and control solutions to improve operational efficiency, ensure regulatory compliance, and minimize environmental impact. Alderon's innovative approach to control system design, combined with their skilled engineering and assembly teams, positions them as an ideal partner for addressing these evolving market needs.

Customers will benefit from Wastewater Supply's technical expertise in system design and product selection, combined with Alderon's manufacturing capabilities for both standard and custom solutions. The company's commitment to education ensures customers receive comprehensive support in selecting appropriate control and monitoring equipment for their specific applications.

Based in Noblesville, Indiana, Wastewater Supply serves customers throughout the region with a comprehensive selection of wastewater treatment products and solutions. The company maintains an extensive inventory of pumps, valves, control panels, and related equipment from leading manufacturers. Through its technical expertise and commitment to customer education, Wastewater Supply helps clients make informed decisions about their wastewater management needs. The company holds accreditation from the Better Business Bureau and continues to expand its product offerings to meet evolving industry requirements.
