Prismoon LLC Reveals Top 5 Dental Clinics in Turkey Through Comprehensive Study

January 12, 2026

January 12, 2026 -

Prismoon LLC, a full-service digital marketing agency, has released findings from its latest independent research evaluating dental clinics across Turkey. The comprehensive analysis identifies the top five providers based on objective, measurable criteria designed to help international patients make informed healthcare decisions.

The study represents the latest addition to Prismoon's Digital Marketing Studies Series, which applies data-driven methodologies to evaluate service providers across various industries. The research team conducted an extensive evaluation of over 50 dental clinics throughout Turkey, ultimately identifying five facilities that excel in clinical excellence, infrastructure, patient experience, innovation, and international standards.

The evaluation process utilized a multi-dimensional scoring system that assessed clinical excellence, infrastructure and technology, patient experience and accessibility, innovation and specialization, and international standards and support. Each category was weighted according to its importance in determining the overall quality of care. The research team collected data through primary research, including facility

assessments and credential verification, secondary research analyzing patient feedback and industry recognitions, and expert consultation with dental industry professionals.

"Our Top Dental Clinics Study was designed to provide patients with unbiased, reliable information when selecting dental care providers in Turkey," said a spokesperson for Prismoon LLC. "We applied rigorous evaluation criteria across multiple dimensions, ensuring that our recommendations are based solely on measurable performance indicators rather than subjective opinions or commercial relationships."

The selection process began with an initial screening of more than 50 established dental clinics across Turkey. After eliminating facilities with regulatory violations or insufficient documentation, researchers narrowed the field to 15 clinics meeting basic threshold criteria. These clinics then underwent detailed assessment using the weighted scoring system, with the top performers subjected to additional verification to ensure geographic diversity and specialty differentiation.

To ensure objectivity and credibility, Prismoon implemented several non-biased safeguards throughout the research process. The company maintains no financial relationships with any evaluated clinics, accepted no paid placements, and did not inform clinics of the study in advance. All evaluation metrics are publicly disclosed. While the study did not undergo formal academic peer review, the methodology and scoring criteria were validated by independent dental industry consultants to ensure clinical relevance.

The Dental Clinics Study Report identifies the following five clinics, listed alphabetically: Hakan Yesilkaya Dental Clinic in Istanbul, Maltepe Dental Clinic in Istanbul, Melsadent Clinic in Istanbul, Ruhi Nalcaci Clinic in Trabzon, and Sevil Smile in Antalya. Each facility demonstrated excellence in distinct areas, providing patients with varied options based on specific treatment needs and priorities. The complete dataset, including detailed scoring breakdowns for all evaluated facilities, is available for review on the Prismoon website.

The study acknowledges certain limitations, including reliance on publicly available information and the absence of on-site clinical audits. Rankings reflect performance at the time of the study, and the research focuses specifically on clinics serving international patients with English-language support.

Prismoon is a full-service digital marketing agency helping SMB and mid-market brands grow through data-driven strategy and creative execution. The company specializes in comprehensive digital growth solutions, including Search Engine Optimization, Content Marketing, Paid Media, and Web Design.
