Newman Windows Announces Expansion into Greater Los Angeles Market with Fifth Location

February 10, 2026

February 10, 2026 -
Newman Windows and Doors today announced its strategic expansion into the Greater Los Angeles area with the opening of its fifth location, marking a significant milestone in the company's growth trajectory across Southern California.

The new facility represents the company's continued commitment to meeting growing demand for quality window and door solutions in one of the nation's largest metropolitan markets. The expansion positions the company to serve residential and multi-family customers throughout The Great Los Angeles Area, including Orange County, Los Angeles County, Riverside County, and San Bernardino County.

"The Greater Los Angeles market presents tremendous opportunities for our company as we continue to expand our footprint in Southern California," said Duncan Newman, owner and founder of Newman Windows and Doors. "This fifth location allows us to bring our products and expertise directly to customers in the region while maintaining the high standards of service that have defined our business."

The Greater Los Angeles area expansion comes as the construction and home improvement sectors in

Southern California continue to experience sustained growth. Industry data indicates that the region's residential renovation market has grown steadily over the past three years, with window and door replacements representing a significant portion of home improvement projects.

The new location will offer the company's full range of window and door products, including energy-efficient options that meet California's strict building codes and environmental standards. The facility will also provide consultation services to help customers select appropriate solutions for their specific needs.

"Entering the Greater Los Angeles market represents more than just geographic expansion; it demonstrates our ability to scale operations while maintaining quality and customer focus," added Newman. "We've carefully planned this expansion to ensure we can deliver the same level of expertise and service that our customers expect from our other four locations."

The company's expansion strategy focuses on establishing a strong presence in key metropolitan areas throughout Southern California. The new Greater Los Angeles location expands the company?s local presence by providing an appointment-only space where customers can view a curated selection of product styles and finishes. While the majority of consultations continue to take place in customers? homes, the showroom offers a convenient option for those who prefer to see select products in person before moving forward.

This location is designed to support homeowners, contractors, and property managers through personalized consultations rather than on-site distribution. Inventory is intended for display purposes only; customers receive expert guidance for final product selection, custom-made ordering, and installation specifics coordinated through scheduled in-home appointments.

The facility will create employment opportunities in the local community, with positions ranging from sales consultants to installation specialists. The company plans to hire locally to build a team familiar with the unique needs and preferences of Greater Los Angeles area customers.

Newman Windows and Doors specializes in providing high-quality window and door solutions for residential properties and multi-family projects. With five locations across Southern California, the company serves customers with a comprehensive selection of products designed to enhance property aesthetics, improve energy efficiency, and increase security. The company has built its reputation on product quality, professional installation services, and commitment to customer satisfaction throughout the region.
