

## **Flat Creek Solutions Expands Waste Management Services Across Waco, TX Metropolitan Region**

*January 15, 2026*

ROBINSON, TX - January 15, 2026 - PRESSADVANTAGE -

Flat Creek Solutions has expanded its comprehensive waste management and dumpster rental services to meet growing demand across 21 cities in the Waco metropolitan area and Central Texas region. The expansion addresses increased construction activity and residential renovation projects throughout the service territory.

The waste management provider now delivers same-day and next-day roll-off container rentals to Waco, Robinson, McGregor, Lorena, Bellmead, Gatesville, Meridian, Groesbeck, Belton, Marlin, Hewitt, Woodway, Temple, Eddy, China Spring, Riesel, Rogers, Chilton, Ross, Killeen, and Rosebud. This expanded service area ensures residents, contractors, and businesses throughout Central Texas have access to reliable waste disposal solutions.

"The growth in construction and home renovation projects across Central Texas has created unprecedented demand for dependable waste management services," said Jeffrey Brown, a representative from Flat Creek Solutions. "Our expansion allows us to maintain same-day delivery capabilities while serving a broader geographic area, ensuring projects stay on schedule without delays caused by waste removal challenges."

The company provides roll-off containers in 20-yard and 30-yard sizes, accommodating projects ranging from residential cleanouts to large-scale commercial construction sites. The 20-yard containers measure 20 feet long by 8 feet wide by 4 feet high, while the 30-yard option extends to 5 feet in height, providing additional capacity for larger projects.

Flat Creek Solutions handles diverse waste disposal needs, including construction debris, yard waste, furniture removal, appliance disposal, and electronic waste recycling. The service expansion comes as Central Texas experiences continued population growth and increased development activity, creating greater demand for professional waste management services.

The company's transparent pricing structure includes delivery, pickup, and disposal fees with no hidden charges. Rental periods extend up to seven days with options for extended rentals, accommodating both quick residential cleanouts and lengthy construction projects. This flexibility has made the company a preferred partner for property managers, contractors, and homeowners throughout the region.

"Our commitment to transparent pricing and flexible rental terms removes the uncertainty often associated with waste management services," added Brown. "Customers know exactly what they're paying for, whether they're clearing a single room or managing debris from a complete demolition project."

Beyond standard dumpster rentals, the company provides specialized services including foreclosure cleanouts, estate cleanings, and demolition support. This comprehensive approach to waste management has established the company as a recognized service provider throughout the Waco metropolitan area.

Flat Creek Solutions began operations focusing on the immediate dumpster rental service in Waco area before expanding throughout Central Texas. The company maintains a fleet of roll-off containers and trucks to ensure reliable service delivery across its expanded territory. Their waste disposal services support residential renovations, commercial construction projects, and community cleanup initiatives throughout the 21 cities they serve.
