

roth kippe ag Highlights Comprehensive Construction Heating and Climate Control Solutions for Swiss Market

January 14, 2026

Dietikon, Zurich - January 14, 2026 -
roth kippe ag, a leading provider of heating, cooling, and drying solutions based in Dietikon, Switzerland, continues to address the growing demand for professional climate control services across residential, commercial, and construction sectors throughout the region.

The company specializes in delivering integrated solutions that encompass heat pump installations, air conditioning systems, construction heating rentals, dehumidification equipment, and water damage restoration services. With a strong focus on energy efficiency and smart technology integration, roth kippe ag serves diverse clients ranging from single-family homeowners to large-scale construction projects and event venues. Additional information about their services can be found at https://roth-kippe-ag.localo.site/.

The company's construction heating division provides mobile heating units designed to maintain optimal temperatures on construction sites during cold weather periods, enabling continuous work progress regardless of seasonal conditions. These temporary heating solutions extend to event venues and tent

installations, ensuring comfortable environments for various occasions throughout Switzerland.

In the residential and commercial sectors, roth kippe ag offers LG brand heat pumps and air conditioning systems suitable for private households, medical facilities, offices, and hotels. The company's heat pump solutions utilize renewable energy sources, contributing to reduced greenhouse gas emissions while decreasing reliance on traditional heating methods.

Water damage restoration represents another critical service area for roth kippe ag. The company employs advanced leak detection technology to identify water intrusion points quickly and accurately, minimizing potential structural damage. Their restoration process includes moisture content assessment, professional drying management, and comprehensive dehumidification measures tailored to each situation. Learn more here: https://www.handwerker.ch/firmen/roth-kippe-ag/8942.

The company's product portfolio includes specialized equipment such as BORA room air clothes dryers and SONORA dehumidifiers, designed for various applications from basement moisture control to commercial archive preservation. These systems incorporate smart technology features that optimize performance while maintaining energy consumption efficiency.

roth kippe ag maintains a showroom facility in Dietikon where clients can examine equipment options and receive personalized consultation from technical specialists. The company's service approach encompasses initial system design, professional installation, and ongoing maintenance programs to ensure long-term system reliability and performance.

The growing emphasis on sustainable building practices and energy-efficient climate control systems in Switzerland has increased demand for integrated solutions that balance performance requirements with environmental considerations. roth kippe ag addresses these needs through its combination of renewable energy technologies, smart control systems, and comprehensive service support.

Based in Dietikon, Switzerland, roth kippe ag has established itself as a trusted provider of heating, cooling, and drying solutions across the Swiss market. The company maintains partnerships with leading equipment manufacturers and employs certified technicians specializing in HVAC systems, water damage restoration, and construction climate control.
