

SoulsticeWellness.com Provides Updated Service for Liposuction Patients to Heal Faster with Peri-Operative Therapy in Denver

March 23, 2016

March 23, 2016 - PRESSADVANTAGE -

SoulsticeWellness.com has been brandishing their efforts in addressing multiple physical complications through the application of their manual therapeutic techniques. They have now updated their services specifically for liposuction patients to heal faster with the Peri-Operative Therapy.

The therapy-providing clinic explains that this latest update in their services emphasizes their gentle, pain-free approach. Not only do they take this to heart, they professionally acknowledge that their clients are mainly in a post-operative, highly sensitive state.

The process of Peri-Operative Therapy takes place 24-48 hours after liposuction surgery when the patient is no longer bedridden or can already handle basic bodily movements. Depending on the patient's willingness to achieve wellness, at the earliest possible time, the clinic arranges the sessions, which prompt the accelerated healing response of the patient's body, lessening their down time or the hours that they would have to spend in bed.

For liposuction patients to heal faster with Peri-Operative Therapy in Denver, they also have the option to commit themselves to a pre-operative appointment, days before their scheduled liposuction is set to take place. At this point, a professional therapist gives the client a rundown of what's going to happen to them as well as the steps they are required to take in order for the practice to take effect in the most optimal way possible. In this introductory process, a personalized treatment program is put together after a series of tests and Q&A's with the patient.

Ultimately, Soulstice Wellness brings to light how their method is effective for patients to heal faster with Peri-Operative Therapy. As published on their website, they have proven that their technique reduces recovery time, alleviates pain, relieves post-op depression and anxiety, increases one's ability to sleep, stimulates circulation, eliminates swelling and bruising, softens scar tissue, smoothens out lumps and bumps, and facilitates normal and healthy lymphatic flow.

For more information about the scope of their Peri-Operative therapy, visit www.soulsticewellness.com.
