

Amana Care Clinic Expands Urgent Care Services Across Quad Cities Region

January 16, 2026

DAVENPORT, Iowa - January 16, 2026 -
Amana Care Clinic, a walk-in medical facility serving the Quad Cities region, has expanded its healthcare services to meet growing demand for accessible non-emergency medical treatment across eastern Iowa communities. The clinic now operates locations in Davenport, Bettendorf, and Muscatine, providing comprehensive urgent care services without requiring appointments.

The expansion addresses increasing community needs for timely medical attention outside traditional hospital emergency departments. The Davenport health clinic offers treatment for a wide range of conditions, including minor injuries, infections, and childhood illnesses, and provides diagnostic services such as X-rays and laboratory testing. The facility serves as an alternative to emergency room visits for non-life-threatening medical concerns.

"The demand for accessible healthcare continues to grow across the Quad Cities region," said Moutaz Kotob, PhD, Medical Director at Amana Care Clinic. "Our expanded presence allows us to serve more patients who

need immediate medical attention but don't require emergency room services. We're seeing increased utilization from families, businesses, and individuals who value the convenience of walk-in care combined with professional medical expertise."

The clinic's certified medical professionals diagnose and treat conditions ranging from seasonal illnesses and minor injuries to chronic condition management. Services include treatment for respiratory infections, musculoskeletal injuries, skin conditions, and urinary tract infections. The facility also provides sports physicals, wound care, and occupational health services for area businesses.

Amana Care Clinic Quad Cities walk-in medical care has become increasingly vital as primary care physician shortages affect communities nationwide. The clinic's model allows patients to receive same-day treatment without scheduling appointments weeks in advance. Patients can either walk in directly or use online check-in systems to reduce wait times.

The expansion comes as urgent care facilities nationwide experience growth due to changing healthcare consumption patterns. Industry data indicate that urgent care visits have increased significantly over the past decade as patients seek convenient alternatives to emergency departments and traditional physician offices.

"We've structured our services to complement existing healthcare infrastructure rather than compete with it," added Dr. Kotob. "Our role is to provide immediate care for conditions that are urgent but not emergencies, helping reduce the burden on hospital emergency departments while ensuring patients receive appropriate treatment quickly."

The clinic's diagnostic capabilities include on-site X-ray equipment and full laboratory services, enabling comprehensive evaluation and treatment during a single visit. This integrated approach reduces the need for multiple appointments and referrals for many common medical conditions.

The Davenport health clinic operates as part of the broader healthcare ecosystem in eastern Iowa, maintaining relationships with area hospitals and specialist providers for cases requiring advanced care. The clinic accepts most major insurance plans and offers transparent pricing for self-pay patients.

Established to address gaps in healthcare accessibility, Amana Care Clinic focuses on delivering efficient medical care in a patient-centered environment. The clinic's locations throughout the Quad Cities region provide residents and visitors with reliable access to professional medical services seven days a week, including evenings and weekends when many traditional medical offices are closed.
